Foreword

AS ANOTHER successful college year is rapidly drawing to a close, we present the 1907 PRISM as a result of our best efforts to give you a picture of university life in general, and of life at the University of Maine in particular. We do not hope that our PRISM is perfect; if it were it would hardly be real; but what we do hope is that you will be generous in your criticism of its all too evident weak spots, and pass by the rest in genial indifference.

Through an uncontrollable law of nature we have been forced to "knock" many of you in the Grinds. If we have missed any of you, we offer our most sincere apologies, and we assure you that it was an oversight. Perhaps a few will think that we have been a little too hard upon them, but if so let us console them by repeating that good old saying, "Every knock is a boost."

We take this opportunity to thank all of those students, members of the faculty, alumni, and friends of the institution who have in any way aided or inspired us to put our best work into this book.

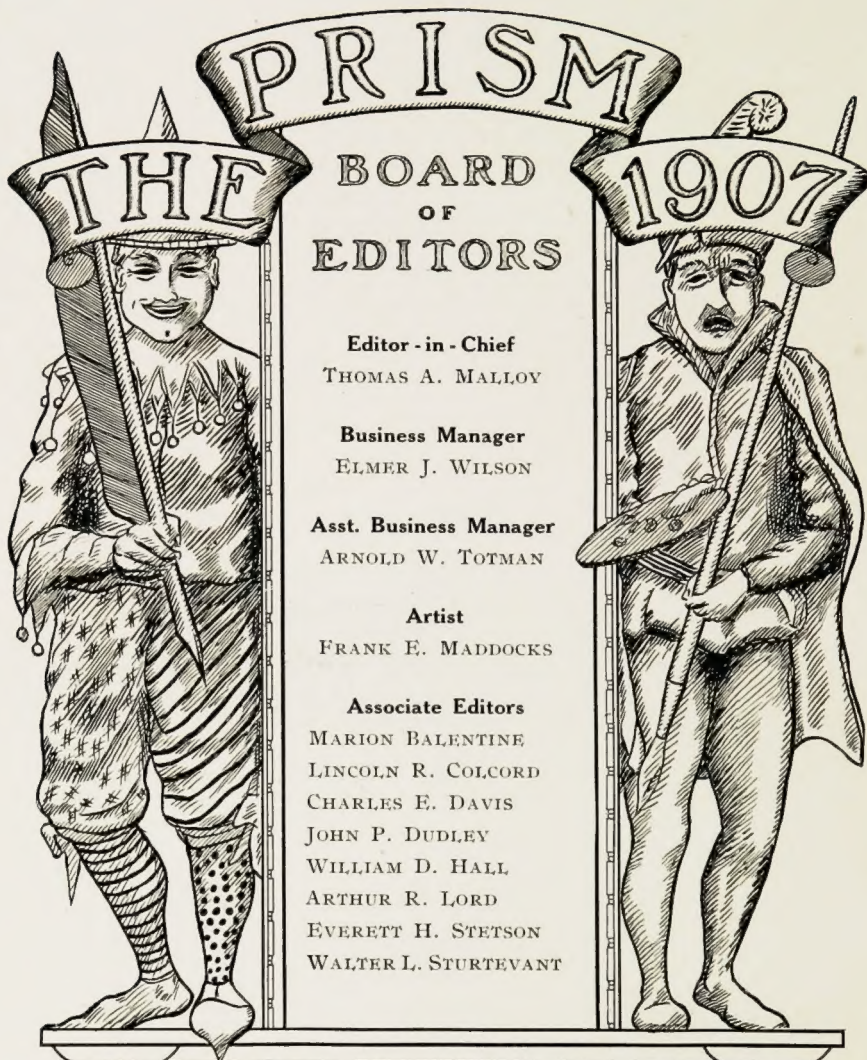

Respectfully

H. S. Webb

To the Memory of

Howard Scott Webb,

whose life of faithful, unselfish service, undemonstrative kindness and sympathy, absolute sincerity, and unflinching adherence to what he deemed right and true, will abide in our minds and hearts as an example and inspiration, we, in deep respect and love, dedicate this Book.

CALNDAR

FALL TERM, 1905

SEPTEMBER 18,	MONDAY.....	Arrearage Examinations Begin.
SEPTEMBER 19,	TUESDAY	Entrance Examinations Begin.
SEPTEMBER 20,	WEDNESDAY.....	Registration Begins, 1.30 P. M.
SEPTEMBER 21,	THURSDAY.....	Fall Term Begins.
NOVEMBER 21,	TUESDAY	Meeting of the Board of Trustees.
NOVEMBER 29,	WEDNESDAY	Thanksgiving Recess Begins, 12 M.
DECEMBER 4,	MONDAY.....	Thanksgiving Recess Ends, 7.45 A. M.
DECEMBER 8,	FRIDAY.....	Sophomore Prize Declamations.
DECEMBER 22,	FRIDAY.....	Christmas Recess Begins, 5.30 P. M.
DECEMBER 29,	FRIDAY.....	Arrearage Examinations Begin. (Spring Term Studies.)

1906

JANUARY 2,	TUESDAY	Christmas Recess Ends, 12 M.
FEBRUARY 2,	FRIDAY.....	Fall Term Ends.

SPRING TERM, 1906

FEBRUARY	3,	SATURDAY	Registration.
FEBRUARY	5,	MONDAY	Spring Term Begins.
APRIL	18,	WEDNESDAY	Easter Recess Begins, 5.30 P. M.
APRIL	23,	MONDAY	Arrearage Examinations Begin. (Fall Term Studies.)
APRIL	25,	WEDNESDAY	Easter Recess Ends, 7.45 A. M.
JUNE	9,	SATURDAY	Junior Exhibition.
JUNE	10,	SUNDAY	Baccalaureate Address.
JUNE	11,	MONDAY	Convocation.
JUNE	11,	MONDAY	Class Day.
JUNE	11,	MONDAY	Reception by the President.
JUNE	12,	TUESDAY	Meeting of the Board of Trustees.
JUNE	12,	TUESDAY	Receptions by the Fraternities.
JUNE	12,	TUESDAY	Address before the Phi Kappa Phi Society.
JUNE	13,	WEDNESDAY	Commencement.
JUNE	13,	WEDNESDAY	Commencement Dinner.
JUNE	13,	WEDNESDAY	Meeting of the Alumni Association.
JUNE	13,	WEDNESDAY	Commencement Concert.
JUNE	14,	THURSDAY	Entrance Examinations Begin.
JULY	2,	MONDAY	Summer Term Begins.
AUGUST	3,	FRIDAY	Summer Term Ends.

CALENDAR OF THE COLLEGE OF LAW

1905

OCTOBER	4,	WEDNESDAY	Fall Term Begins.
DECEMBER	20,	WEDNESDAY	Fall Term Ends.

1906

JANUARY	10,	WEDNESDAY	Winter Term Begins.
MARCH	21,	WEDNESDAY	Winter Term Ends.
MARCH	28,	WEDNESDAY	Spring Term Begins.
JUNE	13,	WEDNESDAY	Commencement.

OFFICERS OF ADMINISTRATION

GEORGE EMORY FELLOWS.....	<i>President of the University</i>
JAMES NORRIS HART.....	<i>Dean of the College of Technology, Agriculture and Pharmacy</i>
JAMES STACY STEVENS	<i>Dean of the College of Arts and Sciences</i>
CHARLES DAYTON WOODS	<i>Director of Experiment Station</i>
WILLIAM EMANUEL WALZ	<i>Dean of the College of Law</i>
ELIZABETH ABBOTT BALENTINE.....	<i>Secretary</i>

OTHER OFFICERS

RALPH KNEELAND JONES.....	<i>Librarian</i>
MAUDE B. COLCORD.....	<i>Assistant Librarian</i>
CHARLES J. SYMMONDS.....	<i>Physical Director</i>
OLA HELEN PERRIN.....	<i>Stenographer</i>
GRACE MAY COLBURN.....	<i>Cashier</i>

ANNIE M. SNOW	<i>Clerk and Stenographer</i>
HENRY A. MILLETT.....	<i>Metorological Observer and Janitor</i>

ACKNOWLEDGEMENTS

The 1907 PRISM Board wishes to express its sincere obligations to the following persons for their hearty co-operation and aid in making up this book :

The members of the faculty of all departments of the University.

ART : — Professor C. P. Weston, A. L. Grover, Mrs. R. K. Jones, T. H. Reynolds, W. H. Pickering, W. M. Hinkley, R. L. Hammond, E. H. Hussey, W. S. MacNamara, E. L. Toner, R. S. Sherman, E. A. Stanford J. N. Jewett, W. A. Hill, Miss S. S. Wakefield, R. K. Steward.

Through a mistake Delta Mu has been placed in its wrong position in the list of fraternities in the order of their establishment at the University. Delta Mu belongs at the end of the list.

Among Junior Class Honors, a mistake was made after the name of B. R. Connell, and should read Houlton High School.

THE FACULTY

The Professors

George Emory Fellows, Ph. D., L. H. D., LL. D.

President and Professor of History.

Born at Beaver Dam, Wis., June 9, 1858; Lawrence University, B. A., 1879; M. A., 1882; Munich and Berne, 1888-90; Berne, Ph. D., 1890; Lawrence, L. H. D., 1902; Bowdoin, LL. D., 1902; Principal Eau Claire, Wis., Seminary, 1879-80; Instructor Ryan High School, Appleton, Wis., 1883-85; Central High School, New Orleans, La., 1885-88; Principal Aurora, Ill., High School, 1890-91; Professor of European History, University of Indiana, 1891-95; Assistant Professor of History, University of Chicago, 1895-1902; President and Professor of History, University of Maine, 1902—; Contributor to *American Journal of Sociology*, *Educational Review*, and other educational periodicals; Author of "Recent European History," Boston, 1902; "Outline Study of the Sixteenth Century," Chicago, 1895; Secretary and Treasurer of the National Association of State Universities; Φ K Φ.

Prexy's word is law in this University, so it is rather risky saying things about him. He attained to some popularity last spring by relieving Carnegie of \$50,000 in "tainted money" with which to build a library. He has many traits of character of which we do not approve, but we think a few more years at Maine will make a thoroughbred of him.

Merritt Caldwell Fernald, M. A., Ph. D., LL. D.

Emeritus Professor of Philosophy.

Born at South Levant, Me., May 26, 1838; Bowdoin College, B. A., 1861; M. A., 1864; Ph. D., 1881; LL. D., 1902; Graduate Study at Harvard, 1863; Principal of Gould's Academy, Bethel, 1863-64; Principal of Houlton Academy, 1865-66; Principal of Foxcroft Academy, 1866-68; Professor of Mathematics and Acting President of University of Maine, 1868-71; Professor of Physics, 1871-79; President, 1879-93; Professor of Philosophy, 1896—; formerly Fellow of American Association for the Advancement of Science; member of National Educational Association; American Social Science Association; Φ B K, Φ K Φ, Θ Δ X.

Were it not for "Prexie" we fear that our engineers would many of them leave college with but an imperfect preparation for their profession. We can imagine what a failure some of our Civils would be without this training in Psychology, Logic and Pedagogy.

Alfred Bellamy Aubert, M. S.

Professor of Chemistry.

Born at New York, N. Y., April 29, 1853; Cornell University, B. S., 1873; University of Maine, M. S.; Professor of Chemistry, University of Maine, 1874—; member of American Chemical Society; Contributor to the *Journal of American Chemical Society*, *Chemical News*, *American Monthly Microscopical Journal*, *Photographic Times*, *Chemical Engineer*, *Le Dratomete*, *La revue generale de Chemie*; $\Phi K \Phi$.

Johnny cuts chapel systematically and cannot find it in his heart to refuse to cancel notifications sent to students for the same reason, hence his popularity. He runs a "cinch" course but we hear that next year they are to have a course embracing mechanics, chemistry, structures, etc. Then all of Johnny's students will turn over and die.

Allen Ellington Rogers, M. A.

Professor of Civics and Constitutional Law.

Born at Ellsworth, Me., April 23, 1855; Bowdoin College, B. A., 1876; M. A., 1880; Principal of Hampden Academy, 1876-77; attended Medical School of Maine, 1878; Instructor at University of Maine, 1879-82; Professor in the University of Maine, 1882—; admitted to Penobscot Bar, 1891; Trustee of Hampden Academy; member of American Economic Association; Author of "Our System of Government"; $\Phi K \Phi$, $\Theta \Delta X$.

There is little occasion to eulogize to any great extent upon Allie's good qualities, as they are too well known to all the student body. A short and easy way to get rid of this long and wearisome task is to quote a saying which is always quite prevalent about registration time and which speaks for itself:—"You're making a big mistake if you graduate from the University of Maine without taking anything under Allie Rogers."

Lucius Herbert Merrill, B. S.

Professor of Biological Chemistry and Chemist in Experiment Station.

Born at Auburn, Me., October 1, 1857; University of Maine, B. S., 1883; Chemist of Experiment Station, 1886—; Instructor of Biological Chemistry, 1897-98; Professor of Biological Chemistry, 1898—; member of American Association for the Advancement of Science; Society for the Promotion of Agricultural Science; $\Phi K \Phi$, ΣX .

His habit of always picking out the longest prayers in the chapel prayer book makes him out much worse than he really is. The thing for which he is especially noted is not so much the way in which he always cracks jokes in biological chemistry but more the evident anger with which he greets any jovial appreciation of them on the part of the students.

James Norris Hart, C. E., M. S.

Dean and Professor of Mathematics and Astronomy.

Born at Willimantic, Me., May 22, 1861; University of Maine, B. C. E., 1885; C. E., 1890; University of Chicago, M. S., 1897; Principal of Dennysville High School, 1885-86; Principal of Machias Grammar School, 1886-87; Instructor in Mathematics and Drawing, University of Maine, 1887-90; Professor of Mathematics and Astronomy, 1891—; Dean, 1903—; member of American Mathematical Society; Astronomical and Astrophysical Society of America; American Association for the Advancement of Science; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

Nearly every student in college has had occasion to visit Janie's little office, and all are sure to get a warm welcome. He neglects to furnish his guests with cigars, but that is probably an oversight. In his wide experience he has probably heard more lies than any other member of the faculty.

Arthur Crawford Jewett, B. S.

Associate Professor of Mechanical Engineering.

Born at Bath, Me., August 26, 1878; Massachusetts Institute of Technology, B. S., 1901; with the American Bridge Co., 1901-03; Instructor in Mechanical Engineering, University of Maine, 1903-05; Associate Professor, 1905—.

He has had the responsibility of the mechanical engineering department thrust upon him but with his trusty Gun(n) he will probably make his mark.

Welton Marks Munson, M. S., Ph. D.

Professor of Horticulture and Horticulturist of the Experiment Station.

Born at Howell, Mich., April 8, 1866; Michigan Agricultural College, B. S., 1888; M. S. 1892; Cornell, Ph. D., 1901; Assistant Horticulturist, Cornell Experiment Station, 1889-91; Professor in University of Maine, 1891—; member of Society for the Promotion of Agricultural Science; New England Botanical Club; American Pomological Society; Fellow of the American Association for the Advancement of Science; $\Sigma \Xi$, $\Phi K \Phi$, $\Phi \Delta \Theta$.

"Chipper" looks like the villian in a 10, 20 and 30 cent show, and were it not that we know his kind disposition, many of us would be afraid of him. He belongs to the "Farm Gang," and is chiefly noted for the quality of the apples that he raises, which many a time have found their way, via the suit case, to the students' rooms.

Horace Melvin Estabrooke.

Professor of English.

Born at Linneus, Me., January 20, 1849; University of Maine, B. S., 1876; M. S., 1884; Bowdoin, M. A., 1891; Emerson School of Oratory; Principal of Dennysville High School, 1877-78; Pembroke High School, 1878-83; First Assistant in Gorham Normal School, 1883-91; Professor of Rhetoric and Modern Languages, University of Maine 1891-95; Professor of English, 1895—; member of American Academy of Political Science; American College and Educational Society; Maine Teachers' Association; Association of Maine Colleges and Preparatory Schools; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

"Honey" is without doubt a poet of considerable repute, but this is not all. In addition to his literary talents he is no mean musician, a fact which is impressed upon the students whenever the University Hymn 580 is sung in chapel.

James Stacy Stevens, M. S., Ph. D.

*Dean in the College of Arts and Sciences and
Professor of Physics.*

Born at Liman, N. Y., August 21, 1864; University of Rochester, B. S., 1885; M. S., 1888; University of Syracuse, M. S., 1889; Ph. D., 1890; on leave of absence at University of Chicago, 1895-96; Special work Massachusetts Institute of Technology; Instructor in Science, Cook's Academy, Havana, N. Y., 1886-91; Professor of Physics, University of Maine, 1891—; Dean in the College of Arts and Sciences, University of Maine, 1905—; member of American Physical Society; Fellow of the American Association for the Advancement of Science; Author of Papers of a general and scientific character; $\Phi B K$, $\Phi K \Phi$, $\Delta K E$.

When anyone wants to wring a few more dollars out of the student body for athletics or specials or any old thing, they have only to go to Jimmie and persuade him to spring a few new jokes at a chapel meeting. In fact Jimmie is coming to have quite a reputation as the Athletic Association's expert pickpocket (money getter).

Gilbert Mottier Gowell, M. S.

Professor of Animal Industry.

Born at Bowdoin, Me., March 14, 1845; University of Maine, 1894; Superintendent of Farm 1882-87; Instructor in Agriculture, 1891-93; Professor of Animal Industry, 1893—; Maine Experiment Station, 1897.

The flowery language with which Prof. Gowell discoursed upon the "Maine Cow" down at Pittsfield has made him famous all over the country and was doubtless responsible in a large part for the handsome prizes offered to agricultural students at the University of Maine. But if the students ever get to the point where they are on an equal footing socially and intellectually with the "Maine Cow" there will no longer be occasion for them to study.

Charles Dayton Woods, B. S., Sc. D.

Director of Experiment Station.

Born at Brooks, Me., September 11, 1856; Wesleyan University, B. S., 1880; University of Maine, Sc. D., 1905; Assistant in Chemistry, Wesleyan, 1880-83; Teacher of Natural Sciences, Wesleyan Academy, Wilbraham, Mass., 1883-88; Chemist and Vice Director of Storrs Agricultural Experiment Station, 1888-96; Professor of Agriculture, University of Maine, 1896-1903; Director of Maine Agricultural Experiment Station, 1896—; Fellow of American Association for the Advancement of Science; member of American Chemical Society; American Forestry Association; International Association of Applied Chemistry; Society for the Promotion of Agricultural Science; American Geographical Society; Φ B K, Φ K Φ , X Ψ .

"Babe" has been knocked so often about his celebrated perpetual prayer that we really haven't the face to hit him again in that quarter. He succeeded in butting his way into Who's Who some time ago and since that time has contented himself with undermining the reputation of several harmless worms.

John Homer Huddilston, M. A., Ph. D.

Professor of Greek.

Born at Cleveland, O., February 9, 1869; Baldwin University, B. A., 1890; M. A., 1892; Harvard, B. A., 1893; Munich, Ph. D., 1897; Instructor in Classics, Baldwin University, 1890-92; Instructor in Greek, Northwestern University, 1893-95; Lecturer in Classical Archaeology, Bryn Mawr College, 1898-99; Professor of Greek, University of Maine, 1899—; member of American Philological Association; Society for the Promotion of Hellenic Studies; Φ K Φ , Σ X.

"Paddy" thinks he is Irish and the rest of us think he ought to be. Once in a while he makes a speech in chapel, and he is much more considerate than the other professors, for he laughs when he is springing a joke, so that we know when to applaud. When he was quite young someone tacked the name Homer onto him, thereby limiting his lifework to the study of Greek.

Gilman Arthur Drew, Ph. D.

Professor of Biology.

Born at Newton, Iowa, November 15, 1868; University of Iowa, B. S., 1890; Johns Hopkins University, Ph. D., 1898; Assistant Principal Hazel Dell Academy, Newton, Iowa, 1890-91; Teacher of Science, Oskaloosa, Iowa High School, 1892-94; Johns Hopkins University Scholar, 1896-97; Fellow from 1897-98; Adam T. Bruce Fellow, 1898; Assistant in Zoology, 1898-1900; Professor of Biology, University of Maine, 1900—; Instructor in charge of Zoology at Marine Biological Laboratory, Wood's Holl, Mass., 1901—; member of American Society of Naturalists; American Society of Zoologists, American Association for the Advancement of Science; Σ Ξ .

"Bug" is certainly "bughouse" on one thing and that is his propensity for springing prelims on his class in biology. It is quite noticeable that the members of his division always get to the recitation room early in order to get a back seat.

Wilbur Fiske Jackman, B. S., Ph. C.

Professor of Pharmacy.

Born at Dryden, Mich., February 20, 1860; University of Michigan, B. S., 1886; Ph. C., 1887; Druggist in Detroit, Mich., 1887-95; Instructor in Pharmacy at University of Maine, 1895-98; Assistant Professor of Pharmacy, 1898-1900; Professor of Pharmacy, 1900 —; member of American Pharmaceutical Association; honorary member of Maine Pharmaceutical Association; corresponding member of Maine Academy of Medicine and Science; author of articles in various pharmaceutical journals; Φ K Φ.

Jackman, like Aubert, has a decided aversion to chapel exercises and whenever he does go it's a "cinch bet" that something of special interest is going to happen. But he is no hypocrite, like some of the chapel leaders who work their list of cuss words to the limit and then call down blessings on the whole ranch from the pulpit. It might be added that he is a star in his line.

Ralph Kneeland Jones, B. S.

Librarian.

Born at Bangor, Me., August 8, 1866; University of Maine, 1886; Amherst School of Library and Economy, 1897; Engaged in business, 1886-97; Librarian of University of Maine, 1897 —; member of American Library Association; Eastern Maine Library Club; Maine Library Association; Φ K Φ, B Θ II.

When, about two years ago, "Goat" interfered with the discus in its flight out on Alumni Field, the students were afraid that the ardour with which he was accustomed to take hold of athletic interests might become dampened, but such was not the case. He is certainly a most generous person, because after finding that the income derived from the college book store was far greater than he could use to advantage he turned the "graft" over to Sampson Bros.

William Daniel Hurd, B. S.

Professor of Agriculture.

Born at Dewitt, Mich., Dec. 19, 1875; Michigan Agricultural College, B. S., 1899; Nursery Inspector for State of Illinois, 1900; Instructor Lansing High School, Mich., 1900-01; Professor of Horticultural, School of Practical Agriculture and Horticulture, Borocloff Manor, N. Y., 1901-03; Extension work for Rhode Island State College, summer, 1903; Professor of Agriculture, University of Maine, 1903 —.

We dislike to think what a sad state of affairs would exist among the Maine granges did they not have Prof. Hurd to pump generous supplies of hot air into their midst. His courses have proved too tempting for some of the engineering students to resist and during the past year he has received many new recruits from among them.

Jacob Bernard Segall, Ph. D.

Professor of Romance Languages.

Born at Roman, Roumania, 1866; University of Iassy, A. B., 1884; University of the City of New York, 1885-86; Polytechnikum of Zurich, 1887-89; University of Munich, 1889-90; Columbia University, 1891-93; Fellow in Romance Languages at Columbia, 1892-93; Columbia, Ph. D., 1893; Instructor in French, Cornell University, 1893-96; University of Paris, 1896-97; Instructor in French, Cornell University, 1899-1900; Lecturer in Modern Languages, McGill University, 1900-01; Instructor in French, College of the City of New York, 1901-03; Professor of Romance Languages, University of Maine, 1903—; author of *Corneille and the Spanish Drama*; articles in *Modern Languages, Notes, Bookman, New International Encyclopaedia*; Editor of *Corneille's Le Menteur*; *Modern Language Association of America*; Φ K Φ.

We absolutely refuse to roast our French professor even if we had any grounds for doing so, which we have not. He is one of the few men whom it is impossible to bluff (that is, for anyone except co-eds). As a permanent Y. M. C. A. man of exemplary habits he has long been the model for many of our students to mould their careers after.

Harold Sherburne Boardman, C. E.

Professor of Civil Engineering.

Born at Bangor, Me., March 31, 1874; University of Maine, B. C. E., 1895; C. E., 1898; graduate study Massachusetts Institute of Technology, 1895-96; Tutor in Drawing, University of Maine, 1896-99; with American Bridge Co., 1899-1901; Instructor in Civil Engineering, University of Maine, 1901-03; Associate Professor in Civil Engineering, 1903-04; Professor of Civil Engineering, 1904—; associate member of American Society of Civil Engineers; member of Society for the Promotion of Engineering Education; Φ K Φ, B Θ II.

His looks belie him, because those who know him say that he is not really dangerous. The one thing that has puzzled the Civils this year is, how a man who has so much to do as Prof. Boardman must have, can find time and opportunity to go into the sheep raising business.

George Davis Chase, Ph. D.

Professor of Latin Language and Literature.

Born at Dighton, Mass., Oct. 27, 1867; Harvard, A. B., 1889; Sub-master and teacher of Latin and Mathematics in Bristol Academy, Taunton, Mass., 1889-94; Harvard Graduate School, 1894-97; Harvard, A. M., 1895; Ph. D., 1897; Harvard traveling fellow at University of Leipzig, 1897-98; Teacher of Latin at Lawrenceville School, Lawrenceville, N. J., 1898-99; Assistant Professor of Comparative Philology, Cornell University, 1899-1901; Instructor in Latin, Wesleyan University, 1901-02; Associate Professor of Latin, 1902-05; Professor of Latin Language and Literature, University of Maine, 1905—; member of the American Philological Association; author of *Selected Lives of Cornelius Nepos*, 1903, and several articles in each of the following publications: *Harvard Studies in Classical Philology, Transactions and Proceedings of the American Philological Association, American Dialect Notes*; Φ B K.

Prof. Chase has been with us only a short time, but in that time we have heard no kicks against him, and therefore it is safe to say that he is probably all right. He can make just as good a bluff in Latin as any of them, and that covers a multitude of sins.

Gordon Edwin Tower, B. S., M. F.

Professor of Forestry.

Born near Belding, Mich., July 5, 1877; Michigan Agricultural College, B. S., 1901; Yale Forest School, M. F., 1905; attended Michigan Agricultural College, 1897-1901; attended Yale Forest School, 1903-1905; taught two terms in Seeley district school, fall and winter, 1896-97; Instructor in Forest Mensuration, summer term, Yale Forest School, Milford, Penna.; Professor of Forestry, University of Maine, 1905—; member of American Forestry Association.

The professor of forestry like the rest of the foresters takes all the "cinches" in college and can smell a streak of hard work a mile off. The better they get acquainted with him the better the foresters like him.

Max Carl Gunther Lentz.

Acting Professor of German Language and Literature.

Born at Hathenors, Prov. Brandenburg, Prussia, Feb. 27, 1857; studied Philosophy, University of Munich, 1878-79; Law, Universities of Berlin, Zurich, Munich, and Geneva, 1879-81; Teacher of Modern and Ancient Languages in different institutions in western part of Texas, 1882-94; Instructor in Modern Language Department of the Paterson Military School, Paterson, N. J., 1894-1901; opened a College Preparatory School in the same city of which he was principal until the great fire in February, 1903; correspondent for European Newspapers and Staff Correspondent in Boston, Mass., for New York Press Bureau; Acting Professor of German Language and Literature, 1905; editor of a series of German text books published by the American Book Company, N. Y., Silver, Burdett & Co., Boston, Green & Co., Boston.

He will without doubt be barred out from the examination in C1 r, as he has already taken way over his limit in cuts (chapel). Some of us wonder whether he smokes a different cigar each day during chapel or whether the same one lasts him a week or more. At commencement this year all the seniors will not have to smoke the same pipe as Prof. Lentz has enough so that he can furnish one apiece.

Miss Caroline Colvin, Ph. D.

Assistant Professor of History.

Indiana University, B. A., 1893; Instructor in History, High School, Fort Wayne, Ind., 1893-98; Fellow in European History, University of Pennsylvania, 1898-01; research work in Ireland and Scotland, 1901-02; Instructor in European History, University of Maine, 1902-03; Assistant Professor of History, 1903—; member American Historical Association, Royal Society of Antiquaries, National Geographic Society; Φ K Φ.

It seems to be impossible to find anything on which to roast Miss Colvin and since she is the only lady member of the faculty it would hardly be courteous to do so at any rate. Everyone recommends her courses in history very highly, which is merely one of the ways of showing their appreciation of Miss Colvin herself.

Charles Partridge Weston, C. E., M. A.

Assistant Professor of Mechanics and Drawing.

Born at Madison, Me., Nov. 8, 1875; University of Maine, B. C. E., 1896; C. E., 1899; Tutor in Physics, University of Maine, 1896-98; Instructor in Civil Engineering, 1898-01; University Fellow in Mechanics, Columbia University, 1901-02; M. A., 1902; Assistant in Mechanics in Columbia University, 1902-04; Assistant Professor of Mechanics and Drawing, University of Maine, 1904—; $\Phi K \Phi$, $B \Theta \Pi$.

Scissors is one of the sharks. He has thus far progressed through mechanics with flying colors and all indications seem to point to his getting out on ninety, but we fear very much that unless he gets a mighty capable horse he will be so hopelessly stuck in basketball that a dozen arrearages will fail to clear him.

Charles J. Symmonds, Captain 12th U. S. Cavalry.

Professor of Military Science and Tactics, and Physical Director.

Born at Holland, Mich., October 6, 1866; U. S. Military Academy at West Point, 1886-90; U. S. Regular Army, 1890—; Professor of Military Science and Tactics at the University of Maine, 1903—.

The captain in his four years' stay among us has contrived to make the military course most attractive to many of our brightest students. It is commonly reported that the captain is considering a vacant rear admiralship in the 12th Cavalry, U. S. A.

Walter Kierstead Ganong, S. B.

Acting Professor of Electrical Engineering.

Worcester Polytechnic Institute, B. S., 1900; University of New Brunswick, 1895-96; Construction Department, Canadian General Electric Company, 1900-01; Electrician, Ontario Graphite Company, Ottawa, 1901-02; Superintendent and Manager, 1902-04; Instructor in Electrical Engineering, University of Maine, 1904-05; Acting Professor of Electrical Engineering, 1905—.

The only fault that we can lay up against "Fritzie" is his name. We think he does extremely well to succeed in life handicapped by such a "handle" as that. He made a record last year on the faculty basketball team, but nearly broke his nose in the attempt.

Freemont Lincoln Russell, B. S., V. S.

Professor of Biology and Veterinarian.

Born at Paris, Me., June 13, 1862; University of Maine, B. S., 1885; New York College of Veterinary Surgeons, V. S., 1886; graduate work at Johns Hopkins University, 1888-89; Veterinarian of the Maine Experiment Station, 1889—; Instructor of Bacteriology and Veterinary Science, 1889-98; Professor, 1898; Inspector in the United States Bureau of Animal Industry, 1891; member of the United States Veterinary Medical Society; Maine Veterinary Medical Association; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

Whenever any of the "horses" which have helped their owners through many a rocky final become sickly —, the horse doctor of the Experiment Station is sent for and 'tis said he takes great delight in dispatching the noble beasts. From long practice in olden days he thoroughly understands all their ins and outs.

Guy Andrew Thompson, M. A.

Assistant Professor of English.

Born at Steward, Ill., 1871; University of Illinois, A. B., 1898; Harvard University, B. A., 1900; M. A., 1901; Instructor in English and German, Millersburg Military Institute, Millersburg, Kentucky, 1898-99; Tutor in English and German, University of Maine, 1901-02; Instructor in English, 1902-05; Assistant Professor of English, 1905—; $\Phi K \Phi$, $\Phi \Gamma \Delta$.

Since "Guy" has been at Maine he has thrown himself, heart and soul, into the task of working for her best interests. On this account, as well as for his own good fellowship, he has attained a popularity among the fellows that is equalled by few of the members of the faculty.

INSTRUCTORS

Archer Lewis Grover, B. S.

Instructor in Drawing.

University of Maine, B. M. E., 1899; B. S., 1902; Φ K Σ .

Thomas Buck, B. S.

Instructor in Mathematics and Astronomy.

University of Maine, B. S., 1901; University of Chicago, 1901-02; Φ K Φ , Φ K Σ .

Henry Martin Shute, M. A.

Instructor in Modern Languages.

Tufts College, B. A., 1902; M. A., 1902; Δ T.

Horace Parlin Hamlin, B. S.

Instructor in Civil Engineering.

University of Maine, B. S., 1902; Φ K Φ , B Θ II.

Marshall Baxter Cummings, M. S.

Instructor in Botany.

University of Vermont, B. S., 1901; University of Maine, M. S., 1904.

Grant Train Davis, B. A.

Instructor in Chemistry.

University of Michigan, B. A., 1903.

Arthur William Cole, B. S.

Instructor in Shop Work.

Worcester Polytechnic Institute, B. S., 1902.

Harley Richard Willard, M. A.

Instructor in Mathematics.

Dartmouth College, B. A., 1899; M. A., 1901; Φ B K.

Raymond Kurtz Morley, M. A.

Instructor in Mathematics.

Tufts College, B. A., M. A., 1904.

Everett Willard Davee.

Instructor in Wood and Iron Work.

Arthur Witter Gilbert, M. S. A.

Instructor in Agriculture and Supervisor of the University Extension Courses.

Massachusetts Agricultural College, B. S., 1904; Cornell University, M. S. A., 1905;
 Φ K Φ , Δ Z, C. S. C.

Matthew Hume Bedford, Ph. D.

Instructor in Chemistry.

Central University of Kentucky, A. B., 1903; University of Pennsylvania, Ph. D., 1905.

Howard Doty Carpenter, A. M.

Instructor in Electrical Engineering.

Princeton, A. B., 1895; A. M., 1896.

Thomas McCheyne Gunn, B. S., M. A.

Assistant in Mechanical Engineering.

State University of Washington, A. B., 1899; M. A., 1900; Massachusetts Institute of Technology, B. S., 1905.

Walter Everett Prince, M. A.

Instructor in English.

Brown University, Ph. B., 1904; M. A., 1905.

William Ross Ham, B. A.

Instructor in Physics.

Bates College, B. A., 1901; Harvard University, summer 1903; Columbia University, summer 1905.

Ira Mellen Bearce, B. S.

Tutor in Physics.

University of Maine, B. S., 1904; $\Phi K \Phi$, $\Sigma A E$.

Stephen John Farrell.

Assistant in Physical Training.

Lawrence Theodore Ernst.

Assistant in Horticulture.

Member of class of 1906, Harvard; $A T \Omega$.

Ralph Low Seabury, B. S.

Assistant in Chemistry.

University of Maine, B. S., 1905; ΘE .

Florence Balentine, B. A.

Assistant in Biology.

University of Maine, B. A., 1905; $\Phi K \Phi$, $\Delta \Sigma$.

Adelbert Sprague, B. S.

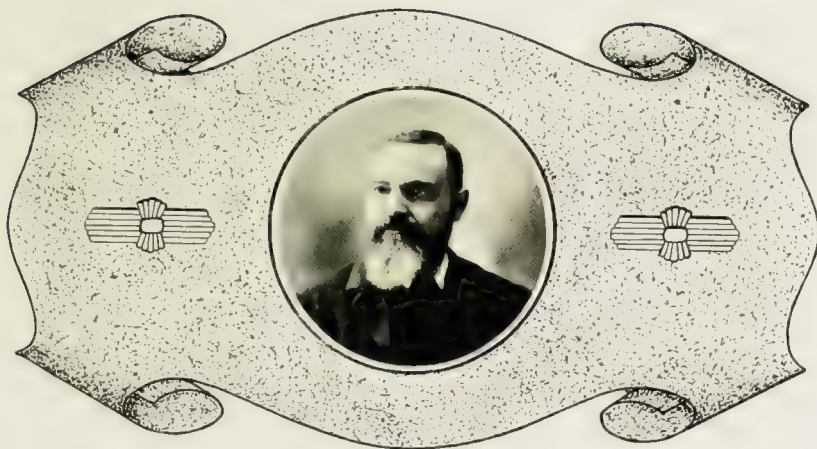

Assistant in English.

University of Maine, B. S., 1905; $\Phi K \Phi$, $K \Sigma$.

COLLEGE

OF LAW

H. E. Walz.

FACULTY

George Emory Fellows, Ph. D., L. H. D., LL. D.

President of the University.

Lawrence University, B. A., 1879; M. A., 1882; Munich and Berne, 1888-90; Berne, Ph. D., 1890; Lawrence, L. H. D., 1902; Bowdoin, LL. D., 1902; Φ K Φ.

William Emanuel Walz, M. A., LL. B.

Professor of Law and Dean of the College of Law.

Educated in Royal Gymnasium at Stuttgart, Germany; Northwestern College, B. A., 1888; M. A., 1892; Harvard, LL. B.; Γ H Γ.

Allen Ellington Rogers, M. A.

Professor of Civics and Constitutional Law.

Bowdoin College, B. A., 1876; M. A., 1880; Medical School of Maine, 1878; Φ K Φ, Θ Δ X.

Edgar Myrick Simpson, B. A.

Assistant Professor in Real Property and Corporations.

Bowdoin College, B. A., 1894; admitted to Bar in 1897.

Bertram Leigh Fletcher, LL. B.

Instructor in Agency.

Boston University Law School, LL. B., 1892; admitted to Bar, 1892

George Henry Worcester, LL. B.

Instructor in Insurance.

University of Maine, LL. B., 1902; admitted to Bar, 1895; Γ H Γ.

Forest John Martin, LL. B.

Resident Lecturer on Common Law Pleading and Maine Practice.

Boston University Law School, LL. B., 1890; admitted to Bar, 1889.

Bartlett Brooks, B. A., LL. B.

Instructor in Contracts

Harvard University, B. A.; Harvard Law School, LL. B.

Hugo Clark, C. E.

Resident Lecturer on Equity Pleading and Practice.

University of Maine, B. C. E., 1890.

Charles Hamlin, M. A.

Lecturer on Bankruptcy and Federal Procedure.

Bowdoin College, B. A., 1857.

Lucilius Alonzo Emery, B. A., LL. D.

Lecturer on Roman Law and Probate Law.

Bowdoin College, B. A., 1861; LL. D., 1898; Justice Supreme Judicial Court; Ψ T.

Andrew Peters Wiswell, LL. D.

Lecturer on Evidence.

Bowdoin College, B. A., 1873; LL. D., 1900; Chief Justice Supreme Judicial Court; Ψ T.

Louis Carver Southard, M. S.

Lecturer on Medico-Legal Relations.

University of Maine, B. S., 1875; member of Massachusetts and United States Supreme Court Bar; Φ K Φ, Φ Γ Δ, Γ H Γ.

Charles Vey Holman, LL. B.

Lecturer on Mining Law.

Harvard University, B. A., 1882; University of Maine, LL. B., 1902; Γ H Γ.

ALUMNI ASSOCIATIONS

THE GENERAL ASSOCIATION

President, JOHN M. OAK, '73, Bangor.

Recording Secretary, FREMONT L. RUSSELL, '85, Orono.

Corresponding Secretary, RALPH K. JONES, '86, Orono.

Treasurer, ARTHUR H. BROWN, '90, Oldtown.

Necrologist, JAMES N. HART, '85, Orono.

Alumni Members of Athletic Association, GEORGE E. THOMPSON, '91, Orono;
EDWARD H. KELLY, '90, Bangor; ALLEN L. BIRD, '00, Rockland.

THE WEST MAINE ASSOCIATION

President, RUSSELL W. EATON, '73, Brunswick.

Secretary, ARTHUR C. WESCOTT, '99, Portland.

THE NORTH MAINE ASSOCIATION

President, HARVEY B. THAYER, '73, Presque Isle.

Secretary, NELSON H. MARTIN, '76, Fort Fairfield.

THE BOSTON ASSOCIATION

President, EDWARD E. PALMER, '99, Boston, Mass.

Secretary, SAMUEL D. THOMPSON, '01, Wollaston, Mass.

THE NEW YORK ASSOCIATION

President, AMBROSE H. WHITE, '90, 30 Broad Street.

Secretary, CHARLES G. CUSHMAN, '89, 30 Broad Street.

THE WASHINGTON (D. C.) ASSOCIATION

President, PERCY L. RICKER, 1900.

Secretary, HARRIS P. GOULD, 1893.

THE PENOBSCOT VALLEY ASSOCIATION

President, CHARLES E. OAK, '76, Bangor.

Secretary, FRANK H. DAMON, '95, Bangor.

THE WESTERN ASSOCIATION

President, CHARLES W. ROGERS, '76, Chicago, Ill.

Secretary and Treasurer, FRED M. DAVIS, '01, Chicago, Ill.

THE SCHENECTADY ASSOCIATION

President, JOHN G. LURVEY, '00, 1206 State Street.

Secretary, HARRY E. DUREN, '02, 306 Lafayette Street.

THE PITTSBURG ASSOCIATION

President, ALLEN G. MITCHELL, '75, 6007 Walnut Street.

Secretary, HENRY E. COLE, '02, 1023 Park Building.

THE KENNEBEC VALLEY ASSOCIATION

President, DE FOREST H. PERKINS, '00, Skowhegan.

Secretary, EDWIN A. PARKER, '04, Skowhegan.

THE SENIOR

Senior History

WHEN we first struck this fair campus we thought we were it with a capital I. We still think so, and it is no business of ours if other people do not hold the same opinion. During our Freshman year the most of our superfluous greenness was removed by a thorough course of instruction under a vengeful Sophomore class. We decided that discretion was the better part of valor, and although we did many brave stunts under cover of darkness, we always had to give in when the Sophomores were present.

Our first year was not entirely wasted, however, as we developed a number of men who "made good" in the various branches of athletics, and who acquitted themselves with much honor in contests with our rival institutions. Our days were spent in what was, for many of us, a futile attempt at plugging, and our evenings in satisfying the vengeance of the Sophomores, who waxed exceeding mad at some of our innocent mistakes.

The fall of our Sophomore year found us both sorrowful and glad, sorrowful because we had lost many of our classmates, and glad because there was now at least one class below us in college. But they proved a tough proposition, and it was only by the exercise of the greatest ingenuity that we concealed from them our real weakness, and thus kept them subdued.

It was during our Sophomore year that Charlie Campbell organized the Phi Kappa Fired, and pledged himself to be one of its strongest members. The organization was the talk of the college for a few weeks, but at last, in the light of greater interests, it faded into insignificance.

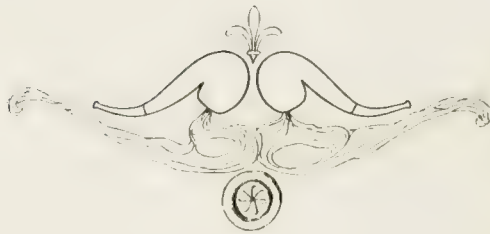

Our Junior year was one long, uninterrupted dream of bliss, until the first reports came out, and then we began to sit up and take notice. Some of us

were merely startled; others frightened to death; and some few dropped out altogether. But we got over the awful scare, and settled down to a profitable spring term.

We entered our Senior year matured by the long years of experience that we have passed through. We took part in no more scraps, and even a good "razoo" failed to call us out of our dope. We were Seniors, and what did we care for the childish amusements that had once attracted us. Nothing occurred to disturb our blissful serenity until "Rudder" Emery taxed us \$8.00 apiece in order to pay up back PRISM bills. It made us gasp for breath. "Reddy" Richardson was for leaving college and going to the poorhouse. Jim Elms wanted to have a bonfire of PRISMS. But the excitement quieted down when the fellows realized that they hadn't paid the \$8.00; they had only been asked for it.

We are now living in a state of inertia, waiting for that long-expected time, Commencement, and chanting to ourselves the words of Omy Ki-Yi:

"Yesterday This day's quiet did prepare,
Tomorrow's Silence will be hard to bear;
Drink, when you know of nothing else to do,
Drink, and you'll lose your chronic dope, for fair!"

SENIOR CLASS

OFFICERS

President, ALBERT JARED BUTTERWORTH.

Vice President, FRED ORAMEL STEVENS.

Secretary, JOANNA CARVER COLCORD.

Treasurer, EDGAR JOHN SAWYER.

Executive Committee.

COLLEGE OF LAW

President, JOHN PERLEY DUDLEY.

Vice President, JOHN BUCKLEY.

Secretary, JOHN JOSEPH KEEGAN.

Treasurer, LAWRENCE SWIFT PERRY.

Executive Committee.

JOHN PERLEY DUDLEY, EDWARD ROY MONROE,

HARRY EDGAR BANGS.

T was in the fall of 1903 that our delegation of one hundred and forty strong made its firm foothold upon the campus of the University of Maine. Our number was the largest that ever entered as a class, and it still continues to have that distinction. On Thursday morning, September 17, we gathered in front of the chapel to attend for the first time, but here we encountered opposition. It was at this time, however, that we first realized our enormous strength when the battling sophomores were held for downs and we pushed steadily on for our first touchdown in the rear of the chapel. The whole of our freshman year was very enjoyable, the many features of which are too numerous to mention. We were always "on high" which was shown by the "1907" which perched upon the college standpipe the whole of the first long winter.

It was at the Indoor Meets that we surprised everyone by winning decisive victories in basketball from 1906 and 1908, and demonstrating speed in track. While as a class we have not had such phenomenal luck as others in winning many victories, we have developed 'varsity men in all branches of athletics that have reflected much credit upon the class and upon the University.

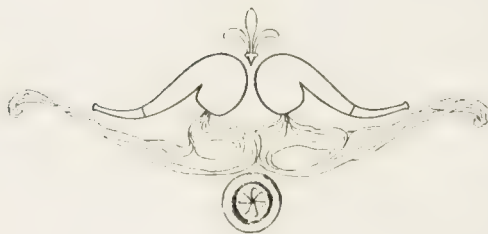

Our sophomore year was one of pleasure. Although the freshmen were large in stature and exceptionally green in actions, we shouldered the task unhesitatingly and baked them to a brown crisp, pointing out their awkward ways and starting them in the straight and narrow path. One of their sad moves was for a banquet at Ellsworth. If they had only been more sly it might have turned out more enjoyable for them. As it was we were more than glad for a special trip to that city, after enduring the quietness of the past winter. It was a shame that their gloriously laden tables should be turned into a quick lunch counter. After the lunch they made their way in the mud to the

Falls, a mile above, and there planned to escape their just punishment. Their expectations were stepped upon, however, when confronted by the 1907 warriors and made to do the quick-step back to the station. The cheers of "'07" which they cheerfully made sounded long and loud through the crowded streets.

The next day on the campus was a notable one for quietness and pleasure, made so by the total absence of freshmen, and it is needless to state that it was a meekish looking crowd that returned a day late.

In the fall of 1905 we returned and easily took up the duties of juniors. With the largest numbers, with the same old class spirit, and with the same loyalty to the University, we are preparing the way to enter as sedate seniors in the near future.

.

JUNIOR HONORS

Aiken, Edith Nora, "Wooz," Δ Σ,
Bangor High School.
Class Secretary (3).

Brewer
Scientific

As Edith is first on our list we really have to deal gently with her frailties. Her worst failing seems to be that of fickleness. For while we don't blame her for sending H. C. about his business, we do think it was rather rough on Brown.

Alexander, William Wesley Bannister, "Reddy," Ω Λ Υ,
Everett, Mass.

Everett High School. Scientific
Mandolin Club (2), (3); Banjo Orchestra (2), (3); Ivy Day
Historian (3); Class Nominating Committee (3); Vice President
Chemical Society (3).

Reddy is a star of the first magnitude, culminating every third day. (Janie will explain these terms on request.) The faculty have it in for Reddy on account of tying the laundryman's horse to Janie's door knob and several other such pranks.

Alton, Francis Osgood,

West Lynn, Mass.

Lynn High School.

Scientific

Banjo Orchestra (1), (2), (3).

Frank is undoubtedly one of the most brilliant men who has ever attended this University and our only regret is that this fact is not more generally recognized. While no one admires modesty more than we do, we think that Frank rather overdoes the thing.

Austin, Alton Arthur, "Shang," K Σ,

Ridlonville

Rumford Falls High School.

Agriculture

Class Baseball (1), (2); Class Football (2); Corporal (2); Secretary Agricultural Club (3).

Shang thinks that the Grange is the coming party in politics, and he devotes all his spare time to its support. We think the reason for this is much more serious than a desire for the baked bean suppers that they serve.

Balentine, Marion, "Molly," Δ Σ,

Orono

Orono High School.

Latin Scientific

Sophomore Prize Declamations (2); PRISM (3); Junior Exhibition Speaker (3).

Molly is small but her ability is in inverse proportion to her size. Being a member of the PRISM board she is quite beyond the narrow prejudices of the human mind. When she grows tall enough to reach the black-board she will be eligible to the faculty.

Barrows, Arad Thompson, "Arad," Δ M, Oakfield
Patten Academy. Civil Engineering
Class Track Team (1); Executive Committee Athletic Association (2), (3).

Life is one long scrap with Arad. Once in a while mechanics or math gets a strangle hold and puts him to the mat, but as a general thing he comes out on top as the members of naught six and naught eight can testify.

Barrows, Lucius Dwelley, "L. D.," Σ A E, Foxcroft
Foxcroft Academy. Civil Engineering
Banjo Orchestra (2); Sophomore Prize Declamations (2);
Secretary Junior Civil Engineering Society (3); Junior Exhibition Speaker (3).

L. D. would make a good minister for some little town where they expect the gospel merchant to wake up once a week. But for all that he is a good fellow. He is secretary of the C. E.'s (not Christian Endeavorers) and has shown his good taste on several other occasions.

Bates, John Thaxter, "Bohm," Σ A E, Calais
Calais High School. Mechanical Engineering
Glee Club (2); President Washington County Club (2);
Secretary and Treasurer Junior Mechanical and Electrical Society (3).

We really don't feel qualified to pass an opinion on Johnnie at this early date. In the course of a few years, however, with a moderate share of good luck we hope to catch him in one of his annual waking spells and see what he is really like when not absorbed in his dreams.

Bean, Ernest Daniel, "E. D.,"
Haverhill High School.

Haverhill, Mass.
Civil Engineering

Beany blundered into the class of 1906 but as soon as he saw our class he decided to stay out a year in order to join us. This act places him on a level with Solomon. He has considerable ability mixed up with his other characteristics.

Bean, Perry Ashley, "Perry,"
Gould's Academy.

Albany
Civil Engineering

Bethel is Perry's abiding place, but Orono and Orono society have quite a few attractions for him just now. His tenor voice is one of his most cherished accomplishments.

Bird, Sidney Morse, 2nd, "Filly Lou," B & O II, Rockland
Rockland High School.

Agriculture
Chief Musician (Military) (1); Leader Banjo Club (2), (3);
Glee Club (2), (3); Vice President Agricultural Club (2).

If there is one thing that Filly likes better than a trip to Oldtown, it is the farm. When he is not "raising" tobacco he indulges in harrowing exercises on the banjo. A brilliant product of our aggy course and much attached to the grange.

Black, Walter Wright, "Blackie," Σ A E, Beverly, Mass.

Walker's Preparatory School. Mechanical Engineering
Aid Junior Promenade (3).

Blackie is one of the Beverly gang, but in spite of that fact seems to be all right. Walter once heard of a man who died from overstudying and he has kept well away from the limit ever since.

Blaisdell, Ernest Dennison, "Sunny Jim," Θ E, Oakland

Oakland High School. Electrical Engineering
Class Baseball (1); Glee Club (1); Mandolin Club (1);
Banjo Orchestra (1).

Blaisdell strolled in on us in our sophomore year and immediately began to mix things up with the band. We haven't seen much of him, but we have sized him up as a happy-go-lucky chap, like the rest of the Theta Epsilons.

Bolt, Ernest Albert, St. John, West N. B.

Bangor Theological Seminary. Special

We don't see much of Ernest, and whenever we do see him he is either hurrying from or toward a car. Within the next year, however, we hope to get a look at his face, and then we will be able to pass judgment on him.

Brann, Benjamin Erwin, "Ben,"

Waterville

Waterville High School.

Civil Engineering

Entered in Sophomore Year from Colby College.

Ben is founder, president, v. p., secretary, treasurer and executive committee of the Maine chapter of Zeta Psi—also its only member. We will not insult Ben by calling him a shark, for truth to tell he takes great pride in his daily flunks.

Brawn, Elwin Dresser, "Gussie," B © II,

Dexter

Dexter High School.

Mechanical Engineering

Manager Class Football (2); Manager Class Basketball (2); Sophomore Hop Committee (2); Executive Committee Athletic Association (3).

The wise rats always leave a sinking ship and since '07 have in sight, Gussie is only one among many good men who have deserted '06 for our standard. Let the good work go on!

Brown, Amon Benjamin, "Amen," Φ Γ Δ, Lincolnville

Camden High School.

Civil Engineering

Corporal (1); Class Baseball (1), (2); Band (1), (2), (3).

Last year Amen was one of our most ardent co-ed chasers, but blest if we know whether his heart is still aiken or not.

Blanchard, Roy Melville, "Fatty Spilliker,"

Cumberland Mills

Westbrook High School.

Civil Engineering

Entered in Junior Year from Norwich University.

During the brief time that Roy has been with us he has contrived to make himself rather prominent. His chief title to fame, however, rests on the cruise of the good ship "Water Wagon," when he made the present aerial record over the Orono-Stillwater course.

Bucknam, Ralph Emerson, "Buck," Ω A Y, Eastport

Boynton High School.

Civil Engineering

Class Calendar Committee (2).

Buck is a rather irrepressible guy and is so good natured that we cannot roast him to good advantage. How Buck ever came to take the civil course is an open question and we doubt if he could answer it himself.

Burleigh, John Holmes, "Jack," A T Ω, South Berwick

Berwick Academy.

Scientific

Class President (1); Class Executive Committee (1), (2); Class Football (1); Varsity Football (2), (3), (4); Captain Varsity Football (4); Sophomore Hop Committee (2); Junior Promenade Committee (3).

We have a great deal of respect for Jack, both as an athlete and as a classmate. He has committed only one grave error and that was in changing from the civil to the scientific course—in other words, from the strenuous to the simple life.

Burns, Caleb Edgar Slocum, "Sloc," ΦΓΔ, Ft. Fairfield

Fort Fairfield High School.

Agriculture

Class Baseball (2); Varsity Baseball (1), (2); Class Executive Committee (2); Sophomore Hop Committee (2); Junior Promenade Committee (3).

Sloc came here with the idea of becoming a parson (fact) but he has since reformed and joined the pigstickers. He is rallying gradually from an acute and prolonged attack of the Bangor habit.

Cayting, Arno Burr, "Tiff," ΩΛΥ,

Brewer

Brewer High School.

Forestry

Manager Class Track Team (1), (2); Class Executive Committee (3); Manager *University Magazine* (3).

Grand Barker of the Society for the Prevention of Cruelty to Trees. He belongs to the crowd that takes a course that can be completed in one year and hangs around for three more years taking "field work," which in plain English means hunting.

Clafin, Francis Marsh Albee, "Claf," Upton, Mass.

Mount Hermon School.

Chemical

Sergeant (2); Second Lieutenant (3).

We would be willing to wager a few pennies that Claf knows the difference between a horse rake and a mowing machine. His manly stride is inherited from an ancestor who once saw the famous six-league boots.

Clayton, Robert Edmund, "Chipper," K Σ, Bangor
Bangor High School. Chemical
Manager Class Football (1), (2); Manager Class Basketball
(2); Mandolin Club (1); Class Track Team (1), (2); Varsity
Track Team (1), (2); Floor Director Junior Promenade (3);
Secretary Chemical Society (3).

Chipper will probably forget to read these sketches until long after the members of naught seven have received their sheepskins, so we do not propose to waste our energies roasting him.

Coffin, Roy Selwin, "Cough," Φ K Σ, Bangor
Bangor High School. Forestry
Manager Class Basketball (1); Glee Club (2); Chairman
Class Calendar Committee (2); Assistant Manager *Campus* (3).

When Roy dragged himself away from the pedestal of his High school glory and came to college those who knew him put out of sight those things that men are allowed to borrow. Since he has been with us he has made considerable money selling bids to college dances.

Colcord, Lincoln Ross, "Doc," K Σ, Searsport
Searsport High School. Civil Engineering
Class Basketball (2); Class Baseball (1); PRISM (3); Exe-
cutive Committee Athletic Association (2); Assistant Editor
Campus (3); *University Magazine* (3); Junior Promenade Com-
mittee (3).

It is entirely unnecessary to say anything of Doc's genius, because it is too well known to need further advertising. He can do all the stunts known to literature, and many that belong to the field of art. Doc says that he intends to finish his college career with the class of '07.

Connell, Bennett Robert, "Ben," Σ X, Houlton
 Ricker Classical Institute. Electrical Engineering
 Aid Sophomore Hop (2); Class Nominating Committee (3).

Ben acquired quite a reputation as a hunter last winter when he found a dead deer in the woods and proudly bore it home, but his reputation would have staid with him longer if he had confined his attentions entirely to that variety of deer.

Cummings, Elmer, "Judge," Δ M, Paris
 Paris High School. Civil Engineering

Everybody smiles again when Rube strikes college and we smell once again the sweet breath of the new mown hay and the cow pasture behind the barn. The girls dote on him as he exhibits the latest Paris fashions.

Davis, Charles Eugene, "Frisky," Θ E, Bridgton
 Bridgton High School. Civil Engineering

Class Baseball (1), (2); Manager Class Baseball (2); Secretary and Vice President Debating Club (2); President Debating Club (3); Bates-Maine Debate (2); PRISM (3); Executive Committee Athletic Association (2), (3); Junior Exhibition Speaker (3).

Frisky is an orator of considerable fame. He devotes his oratorical powers, however, chiefly to persuading others that he is not so young as he looks. He travels summers advertising Dr. Henley's "Grow Tall" medicine.

Devereux, Rosman Styer, "Dev,"

Eastern State Normal School.

Castine

Civil Engineering

Dev is a wanderer—a man without a country. Neither his class, nor his course, nor even his boarding place is a fixed quantity. His college alone is always the same—for with Dev it is Maine or nowhere.

Druery, Edward James, "Ned,"

Cony High School.

Augusta

Chemical

Class Track Team (2); Varsity Track Team (2); Aid Junior Promenade (3).

Druery broke loose from a place down the line called Augusta and has been leading a hermit's life ever since. He is naturally bashful and he blushes at the name—woman. He was once so bold as to be seen out walking with his sister.

Erskine, Fred Stoddard Neville, "Shorty," © E.

East Boston, Mass.

East Boston High School.

Agriculture

Sergeant Major (2); Second Lieutenant (3).

Shorty believes that military drill is a major portion of a farmer's education. On his farm the stock will have to "count fours" and "right dress" to the orders of the major general of Shorty's dreams.

Eveleth, Harry Pope, "Spike," K Σ, Greenville Jct.
Coburn Classical Institute. Electrical Engineering
Class Baseball (1), (2).

"Spike the silent man." But just start him going on one of his tales of life at Greenville and he'll talk you out of house and hearing.

Fagan, James Patrick Vincent, "Paddy," Δ M, Oldtown
Oldtown High School.

We don't see as much of Pat as we'd like to owing to the fact that he spends all his nights in Oldtown. This is nothing against his character as he lives there. His remarkable propensity for talking is but the natural outcome of his long association with the locker room gang.

Foster, Roberto Mower, "Doc," Φ K Σ, Lisbon
Edward Little High School. Electrical Engineering
Glee Club (1), (2), (3); Secretary Musical Clubs (3).

Since Doc struck college he has acquired good habits so fast that he has to be introduced to his former pals all over ever time he goes home. And still there is room for improvement.

Galland, Joseph, "Joe," A T Ω,
Biddeford High School.

Biddeford
Civil Engineering

Joe spends all his time plugging mechanics nowadays. We are undecided whether he expects to kill the stuff (vain hope!) or whether he is merely laying up knowledge against the arrearage.

Garland, Carl, "Parson,"

Hampden

Eastern Maine Conference Seminary. Classical
Entered Junior Year from Bangor Theological Seminary.
Ivy Day Chaplain (3); Marshal Order of the Temple (3).

The Rev. Karl is a present help in time of trouble to many of the psychology and pedagogy sharks. Whenever one of these get stuck he would "like to hear Mr. Garland's opinion on this subject" and thus far the charm has never failed to work.

Gellerson, Rex Carleton, "Jerry," Θ E, Fort Fairfield
Fort Fairfield High School. Pharmacy
Aid Junior Promenade (3).

When Jerry was in his third year he discovered to his dismay that the entree of Orono's four hundred does not count towards a degree. Now he spends his days in the lab and his nights figuring up how many credits he must get each month in order to graduate.

Greany, Thomas Henry, "Primrose," Fall River, Mass.
 B. M. C. Durfee High School. Civil Engineering
 Entered in Junior Year from Rensselaer Polytechnic
 Institute.

According to Primrose Rensselaer is *the* place to get an education and they have the *best* set of fellows there. . . . "Why, they fire all the bad eggs out down there!" says Prim. If anyone draws any conclusions concerning Prim from this he has only himself to kick.

Green, Herbert Henry, "Greeny," Spencer, Mass.
 David Prouty High School. Agriculture
 Entered in Junior Year from Massachusetts Agricultural
 College.

Greeny has been with us but a short time, but in sizing him up rapidly we predict that he will "get by." Another man who chose wisely in the matter of a college.

Goodrich, Joe Kinsman, "Joe," K Σ, Skowhegan
 Skowhegan High School. Civics
 Honorable Mention Sophomore Prize Declamations (2);
 Reader Musical Clubs (1), (2), (3); Manager Musical Clubs (3);
 Presentator Ivy Day (3); Secretary Somerset County Club (3).

"Oh wad some power the giftie gie us
 To see oursel's as ithers see us!"

Religious fervor has even carried this man so far as to make him set out on "The First Crusade."

Hall, William Dickson, "Bill," $\Phi \Gamma \Delta$, Rockland
Rockland High School. Scientific
Class Treasurer (3); PRISM (3); Class Nominating Committee (3); Junior Promenade Committee (3).

Bill has undertaken the job of skinning the Bangor merchants for the Phigis and judging by the way he has skinned the Phigis in these sketches he should make a success of the job.

Harlow, Edward Thomas, "Buttinsky," South Brewer
Brewer High School. Civil Engineering
Aid Sophomore Hop (2); Class Track Team (2); Junior
Week Committee (3).

If ever a man were fitly named it is this same Buttinsky. Neither four hundred nor forty-nine is safe from his intrusions. He was a prime mover in bringing the Water Wagon to its sad end and is a charter member of the C. C. C., the D. H. D., the R. H. G., and several other similar organizations.

Harvell, John Perham, "Johnnie," Red Beach
Calais High School. Mechanical Engineering

We are rather undecided as to classing Johnnie as a student, having seen so little of him during his college course. It is not everybody whose clothes are chosen so well to make him appear the sport as are Johnnie's.

Hayward, Guy Edwin, "Prexie," $\Phi \Gamma \Delta$, Winthrop
Winthrop High School. Classical

Executive Committee Athletic Association (2), (3); Assistant
Manager Baseball (2); Manager Baseball (3); Aid Sophomore
Hop (2); Junior Week Committee (3); Aid Junior Promenade (3).

Prexie is a good little boy, and is firmly grounded in the belief that a
pipe and a spreading pair of corduroys go a long ways towards supplying
the proper dignity to a baseball manager.

Hodgkins, Alden, Damariscotta Mills
Lincoln Academy. Scientific
Class Nominating Committee (3).

A man who has taught school as long as has Alden certainly ought to be
able to bluff the pros in pretty good style, but such is not the case. Alden
plugs as hard as the rest of us.

Hodgkins, Lincoln Hall, "Link," $\Phi K \Sigma$, Bunker Hill
Bunker Hill Academy. Civil Engineering
Glee Club (1), (2); Kidder Scholarship (2).

Twin to H. C. and backed by T. Buck we don't see how this man can
fail to startle the world, even though his attempts to stick Scissors in
mechanics have not proven very successful thus far.

Holbrook, Franklin Pratt, "Strawberry," Brooks
Coburn Classical Institute. Civil Engineering
Band (1), (2), (3); Orchestra (2), (3); Secretary Orchestra
(3); Sergeant (2).

Nearly three years ago Strawberry removed his overalls and cowhides and allowed he'd come to college. He is the composer of the famous Brooks Bonfire March which he blows into his magic flute by the barrelful.

Hooper, Elmer Guy, "General," West Lynn, Mass.
Lynn Classical High School. Civil Engineering
First Sergeant (2); First Lieutenant (3); Junior Exhibition
Speaker (3).

Next to Capt. Symmonds of the 12th Cavalry, and possibly H. C., this man is in our opinion the most popular man in college. While college opens nominally about the middle of September, the real work begins about a month later when the general returns to direct affairs.

Hosmer, Fred Pote, "Freddie," A T Ω, Rockland
Rockland High School. Chemical
Class Football (1); Captain Class Baseball (2); Executive
Committee Athletic Association (2), (3); Treasurer Chemical
Society (3); Class Nominating Committee (3); Aid Junior
Promenade (3).

Freddie arrived here imbued with the idea that he was as good as they make them around these parts, and he still clings tenaciously to his out-grown fancies.

Hussey, Erwin Howard, "Gramp,"
Guilford High School.

Guilford
Civil Engineering

On the morning subsequent to the visit of the sheep to have Boardy cancel its pine tree, Gramp admitted that he felt bully, and he certainly looked rather sheepish, too! Who knows? We don't, but we have our suspicions.

Hutchins, Wilbury Owen, "Hutch," $\Omega \Delta Y$, Orland
East Maine Conference Seminary.
Sophomore Prize Declamations (2).

Latin Scientific

Hutch has not committed any folly for which we can soak him in this column. He has not as yet been awake long enough at a spell to drop in at the club, or to hold any "birthday parties," or even to found a new club in order to be president of it.

Iverson, Arthur, "Eva," ΣX ,
Ricker Classical Institute.

Houlton
Civil Engineering

Band (2), (3); Aid Junior Promenade (3).

Arthur is the chief mainstay of the band. It is said that he has written some excellent music which he intends to play at the next concert with the rest of the band to barricade the doors and keep the audience pacified.

Jordan, Victor Burns,
Hartland High School.

Hartland
Forestry

While this man specializes in forestry, he also dabbles occasionally in henology, and is at present making a study of the matrimonial inclinations of the Libby variety.

Judkins, Ernest Laroy, "Jud,"
Skowhegan High School.

Skowhegan
Electrical Engineering

Jud is a quiet fellow who has a shingle out on Pluggers' Row, Oak Hall, and does considerable business there. His only close rivals in the Hall are Gramp and Strawberry in the order named.

Kierstead, Horton Wilmot, "Hank," ΣX , Fairfield
Waterville High School. Civil Engineering
Class Football (1); President Junior Civil Engineering
Society (3).

Coming only two years ago from the farm, Hank was so overcome by the honor conferred upon him in making him president of the Civil Society that he immediately came down with the measles. We all have to be educated to great positions.

Knowlton, Herbert Austin, Pembroke
 Pembroke High School. Electrical Engineering
 Class Track Team (2); Class Relay (2); Varsity Track
 Team (2).

Last winter this man astonished us all by raising a moustache on his upper left-hand lip. Sad to relate his memory went back on him one morning and he washed said moustache completely away.

Lambe, Emerson Peavy, "Jibberson," Calais
 Calais High School. Electrical Engineering

In our opinion Jibberson left the tender influences of home just a little too soon. His roommate Johnnie, however, is a thorough man of the world, and Eli is fast picking up the fine points of the game.

Lambe, Reginald Robert, "Rex," $\Sigma A E$, Calais
 Calais High School. Mechanical Engineering

Rex was a heavy stockholder in the Club, and when that bubble went up in smoke he lost all desire to travel, and settled down to get acquainted with the rest of the class.

Leckberg, Carl Henry, "Leck," ΣX , Worcester, Mass.
 Worcester English High School. Electrical Engineering
 Band (1), (2), (3); Assistant Manager Band (2); Manager
 Band (3); Student Council (3); President Mechanical and Elec-
 trical Society (3); Class Executive Committee (3); College
 Orchestra (2), (3); Assistant Manager College Orchestra (3).

Leck has worn a wise look ever since he first appeared on the campus, and the class elected him to the Student Council on the strength of that alone. He is also head hostler on the Band Wagon.

Lisherness, Ernest, "Lish," $\Phi \Gamma \Delta$, North New Portland
 North New Portland High School. Civil Engineering
 Class Track Team (1), (2); Captain Class Track Team (1);
 Class Relay (1), (2); Varsity Track Team (2); Class Calendar
 Committee (2).

Lish surprised himself and the rest of his "fraternity" by winning his "M" in last year's track meet. He surprised us still more by wearing the same sized hat after that happy event.

Lord, Arthur Russell, "Faculty," Ipswich, Mass.
 Manning High School. Civil Engineering
 Ivy Day Prophet (3); Vice President Junior Civil Engineer-
 ing Society (3); Class Nominating Committee (3); PRISM (3);
 Editor-in-Chief *University Magazine* (3), (4); Junior Exhibi-
 tion Speaker.

There is a little hamlet up in Massachusetts by the name of Ipswich, and it is from there that Arthur hails. Ipswich is from two Indian words meaning "back to the pasture," but we don't lay this up against Arthur. What if he does wear a collar and necktie this year? Isn't he editor-in-chief of the *Magazine*?

Libby, Eva Catherine, "Pussy,"
Hartland High School.

Hartland
Special

While Pussy started late she was soon full in the current of class and social life. She has a decided preference for things pertaining to the forestry course and is fond of all birds, especially jays.

Macomber, Carlton Hambly, "Mac," Portsmouth, R. I.
Oak Grove Seminary. Mechanical Engineering
Second Sergeant (2); Second Lieutenant (3).

With most of us study is a hard and uncompromising thing to be taken in small doses and those as sparingly as possible. Mac, on the other hand, is exceedingly stuck on his studies—so much so that it would surprise us not at all should he pursue his course for a few extra years.

McKenzie, Herman Ellis, "Sunny Jim," W. Jonesport
Jonesport High School. Mechanical Engineering
Band (1), (3); Sergeant (2); Class Track Team (2); Varsity
Track Team (2).

Sunny strolled up from Jonesport in the fall of 1903 with his mouth open and his pants shrinking away from his feet (they have our sympathy). He bids fair to become a real sport as well as a scientific marvel ere he completes his course at the Experiment Station.

Maddocks, Frank Everett, "Dub,"
Stevens Academy.
PRISM Artist (3).

Bluehill
Civil Engineering

Dub is responsible for most of the art in this book so we leave him to be soaked by those whom he has roasted. If you have any grudges please settle them with this man as we have unanimously elected him as our official scrapper.

Malloy, Thomas Angelo, "Tom," K Σ Lewiston
Lewiston High School. Civil Engineering
Class Calendar Committee (2); Treasurer Twin City Club
(2); Ivy Day Poet (3); Student Council (3); Editor-in-Chief
PRISM (3); Class Nominating Committee (3); *University Magazine* (3).

When Tom is not sleeping, or leading the Count into evil ways, he is busy roasting somebody in the PRISM. Among his college honors should be included: — President for life of the "Pine Tree Club."

Mansfield, Mildred Charlotte, "Patty," Δ Σ, Orono
Orono High School. Latin Scientific
Ivy Day Odlist (3).

Mildred has kept track of the editor's chapel cuts during the winter, which was entirely sufficient to keep her out of all mischief.

Martin, Charles Henry, "Squab," $\Phi \Gamma \Delta$, Fort Fairfield
Fort Fairfield High School. Civil Engineering
Class Baseball (2).

Some of the fellows say cutting things about Squab. They say that this little sawed-off pimp plans to become "Mayor of Fort Fairfield." What if he does strut about in his all-important way? Didn't he get a hit in a class baseball game?

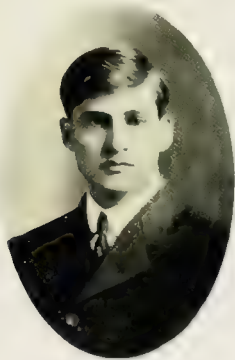

Mathieu, Joseph Clarence, "Stub," ΔM , Farmington
Farmington High School. Mechanical Engineering

Stub is a meek little fellow who is often mistaken for a parson. The racket and dissipation of Oak Hall were so disagreeable to him that he had to move out and every day his conviction never to return takes a deeper hold on him.

Merrill, Joseph Farrington, "Pomp," Auburn
Edward Little High School. Special

The greener they are the quicker they tumble, and it took Pomp just about two months to change his base of operations and become a fellow-student instead of the butt of all our jokes.

MacDonald, Karl, "Mac," B © II, Belfast
 Belfast High School. Mechanical Engineering
 'Varsity Baseball (1), (2); Class Baseball (1), (2); Class
 Football (2); Band (2).

Another wise man who shook '06. The report was once spread about that Mac was plugging but such falsehoods always prove their own undoing. Mac was only taking a nap behind a book that was upside down.

Nickels, Herbert Lewis, "Nick," Cherryfield
 Cherryfield Academy. Civil Engineering

Nick is supplied with all the requisites for a scientific and successful cribber, including an innocent expression and a pocket edition of a livery stable.

Orne, Sidney Baxter, "Sid," Boothbay Harbor
 Boothbay Harbor High School. Mechanical Engineering

Sid is president, ex-officio (whatever that means) of the locker room gang of bums. He is Smut's closest rival as a consumer of tobacco and like him has Phi Kappa Phi aspirations.

Palacio, Enrique Perez, "Count," Lima, Peru, S. A.
 Lima High School. Civil Engineering
 Entered in Junior Year from Special School for Engineers
 in Civil Construction, Mines, etc., of Peru.

The Count is a man of many strange and wierd experiences. From the time when in his young and immature youth he left his native wigwam for a northern clime misfortune has constantly beset his path. The change from a pair of sandals and a Panama hat to the modern full dress has clouded his formerly serene and contented countenance and left him but a homesick lad.

Packard, Harry Ellsworth, "Turk," Σ A E, Winthrop
 Coburn Classical Institute. Civil Engineering

Turk never believed that his special mission in life was to hurry. Consequently he has done nothing thus far to lay him open to our knocker, his blushes to the contrary notwithstanding.

Pennell, Alcot Johnson, "Sniff,"
 Melrose Highlands, Mass.
 Melrose High School. Electrical Engineering
 Mandolin-Guitar Club (2), (3); Banjo Orchestra (2), (3).

This man is one of our most welcome visitors and we are always urging him to come oftener and make sure that everything about the PRISM suits him. We should hate to have the PRISM contain anything of which Sniff disapproved.

Perry, Donald Cushman, "Don,"

Island Falls

Island Falls High School.

Electrical Engineering

We have it from Don that there are exactly 2,816 ties between here and Orono. This statement is based on a series of experiments covering the past three winters and is the average of over eight hundred individual counts.

Perry, Tedcastle Bigelow, "Ted,"

Island Falls

Island Falls High School.

Electrical Engineering

The original "rough-house gang" was patterned after the wild deeds of Teddy, the "leading exponent of the strenuous life."

Philbrook, Earle Walter, "Cuffy," B @ II, Milan, N. H.

Gould's Academy.

Civil Engineering

Class Basketball (1); Aid Sophomore Hop (2); Sophomore Prize Declamations (2); Assistant Manager Football (3); Manager Football (4); Junior Week Committee (3).

Cuffy is a disciple of Shylock. Life is a business deal with him. His strenuous college life is only broken by his strenuous trips to Oldtown and vicinity. Years hence he will deliver a series of lectures on "Four Years in Oldtown; or Peculiar Advantages of a College Education."

Philbrook, Howard Grenville, "Flintlock," B @ II,
Shelbourne, N. H.

Gould's Academy. Electrical Engineering
Corporal (1); First Sergeant (2); Sophomore Hop Committee (2); First Lieutenant (3); Class Nominating Committee (3); Junior Exhibition Speaker (3); Aid Junior Promenade (3).

A rocky specimen from the rocks and crags of the "Old Granite State." What "Flintlock" does not know about the woods and rivers is not to be found in books. He possesses a charming manner which he uses on all social and political occasions.

Pickering, Winthrop, "Pick," New Haven, Conn.
New Haven High School. Special
Entered in Junior Year.

Pickering has been seen around college a few times, but when reminded of the fact he made haste to get off the campus. But he doesn't need to visit us very often, because he takes a few of the forestry cinches.

Pierce, Stephen Franklin, "Pete," @ E, Cooper Mills
Cony High School. Civil Engineering
Sergeant (2); First Lieutenant (3); Class Nominating Committee (3).

While Cooper's Mills is not on the map it nevertheless determined to be represented so Pete was sent along. He aspires to become commander-in-chief of the army although he is only four feet and a half tall.

Plummer, Arthur Bartlett, "Plum," Φ Γ Δ,
North New Portland

North New Portland High School. Forestry
Glee Club (1), (2), (3); Leader Glee Club (2), (3); University Quartette (1), (2), (3); Leader University Quartette (2), (3); Chapel Choir (1), (2), (3); Leader Chapel Choir (3); Band (1), (2), (3); Leader Band (3); University Orchestra (1), (2), (3); Manager University Orchestra (3).

Plum was born with a pitch pipe in one hand and a roll of music in the other and he has been indulging in his musical pipe dreams ever since. Another '06 man bequeathed to us by the college widow.

Purington, Heber Penn, "Rusty," Jay
Wilton Academy. Civil Engineering

We call Brown "Newry," but we draw the line when it comes to calling Rusty by the name of the place he hails from. We have no reason to do such a thing and all these sketches are founded on fact.

Quint, Raymond Alton, "Squint," Β Θ Π, No. Berwick
Berwick Academy. Electrical Engineering

Executive Committee Athletic Association (1); Class Baseball (1), (2); Class Football (1); Varsity Baseball (1), (2); Varsity Football (2), (3).

In the fall of '03 a pair of oxen came down the campus road drawing a cart in which was seated a tow-headed youth in a dusty brown suit and copper-toed boots. He stopped the conveyance in front of Wingate Hall and said to the janitor, "How be ye? Is the principal in?" And thus began the college career of the "Hero of Sanford."

Read, Carroll Arthur, "Speaker,"

Stillwater

Oldtown High School.

Electrical Engineering

Class Relay (1).

"And still they gazed and still the wonder grew,
That one small head could carry all he thought he knew."

According to Speaker "knowledge is either knowing a thing or making the pros believe you know it," and Stillwater is certainly a knowing one by his own showing.

Reed, Lowell Jacob, "Mouser," $\Phi K \Sigma$, Berlin, N. H.

Berlin High School.

Electrical Engineering

Sophomore Hop Committee (2); Junior Promenade Committee (3).

Mouser at present belongs to the Phi Kappa Sigma's, but with Tommy's help he hopes in time to change the last initial. When he is not plugging he spends his time getting a pull with the faculty in a way that would do credit to a diplomat.

Ridge, Reginald, "Reggy," $K \Sigma$,

Portland

Portland High School.

Civil Engineering

Class Football (1); Class Executive Committee (1); Class Basketball (2).

Reggy is another of the strenuous men. He never comes into recitations more than ten or fifteen minutes late and he has never lacked more than seventy points of passing in any subject thus far.

Rockwood, Noel Mumford, "Snooks,"

Calais

Calais High School.

Aid Junior Promenade (3).

"This way to the circus, day and night performances." Snooks is everybody's friend and is always ready to go anywhere with anybody at any time for anything provided it does not interfere with his plugging in any way.

Rollins, Deane Whittier, "Rollie," Φ Γ Δ,

Farmington Falls

Farmington High School.

Classical

Band (1), (2), (3); University Orchestra (2).

Since the first time that Rollie waited on table they have called him "Lightning." Actually he is so slow that the eggs hatch before he can get them on the table. They call him "Echo" in the band.

Rounds, Albert Prentiss, "Fathead,"

Bridgton

Bridgton High School.

Civil Engineering

Second Sergeant (2); Second Lieutenant (3); Bates-Maine Debate (2); Junior Exhibition Speaker (3).

"The man with the leaky nose." Mr. Rounds has requested us to say that he has been grossly misrepresented. He is not a fat head and in the future he will put a crease in the trousers of anyone who calls him by that odious name.

Russell, William Henry, "Bill," East Boston, Mass.
East Boston High School. Civil Engineering

J. Fizz is one of the East Bostonites and like others from that little rural hamlet has not as yet cultivated his table manners. His favorite occupation is selling bed space to the freshmen at fifty cents a head.

St. Onge, Walter James, "Saint," Ω Δ Υ, Dover
Foxcroft Academy. Electrical Engineering
Class Track Team (1), (2); Varsity Track Team (1), (2);
Holder Half Mile Record (2); Class Basketball (1), (2); Varsity
Basketball (2); Class Relay (2); Varsity Relay (2); Captain
Class Basketball (2); Executive Committee Athletic Association
(2); Worcester Team (2).

The Saint, as his title indicates, might be a good deal worse without spoiling. He has picked up a few points about track athletics and basketball during his course, and he always stands well in his classes although no one would call him a grind.

Sampson, Arthur Haskell, "Sammy," Gorham
Gorham High School. Chemical
Executive Committee Athletic Association (2).

Sammy is planning to stay with us a few extra years until his young brother comes along to keep the college gold mine in the family. "In God we trust; all others cash!" "I'd rather be a waiter in the store of Sampson Bros. than dealer in a faculty card game!" "Ah, but think of the money we're making!"

Scammon, William Francis, "Scamp," $\Omega \Delta \Upsilon$,
Berlin Mills, N. H.

Berlin Mills High School.

Scientific

When Scamp makes his bi-weekly visit to the French class Jake Segall shakes hands with him, tells him the book they're reading, and then calls on him for the next two weeks. Lucky Scamp!

Schoppe, William Freeman, "Bill," $\Sigma \Delta E$, W. Auburn
Hebron Academy.

Agriculture

Class Football (1); Class Basketball (1), (2); 'Varsity Track Team (1); Class Nominating Committee (3).

When Bill visits Belfast his movements are all recorded in the "Belfast Tell-Tale" with all the minuteness of a presidential visit. The reason is not hard to find. It was love at first sight but it took Bill three weeks to find it out.

Seamon, Percy Ralph, "Tapley," ΔM , Roxbury, Mass.

Roxbury High School.

Electrical Engineering

We wish to disclaim at the beginning any attempt to make this a complete and authentic record of the college career of Percival de Fusta Tapley Twitchett. Among other things Fido is the originator of the famous quintuple pass which wrought such havoc as worked by Tapley's Own Honey Eaters Football Team.

Simmons, Frederick Johnson, "Sis,"

Morrill High School.

Morrill

Classical

In spite of appearances Freddie is a "wegular wuffian." His gait, as he will tell you, is the result of six years' unremitting practice. He takes a cinch course which is the only tie that binds him to the rest of the student body.

Smith, Herbert Henry, "Smithy,"

East Corinth Academy.

East Corinth

Civil Engineering

Smithy is uncommonly cheerful for a man who has to walk the rails to and from Orono four times a day. Probably the secret lies in the fact that while he takes the man's course he has managed to nail a good many cinches.

Stetson, Everett Halliday, "Stet," K Σ,

Edward Little High School.

Auburn

Civil Engineering

PRISM (3); Class Nominating Committee (3); Aid Junior Promenade (3).

When Stet gets on his Glad Rags and lights one of his Big Cigars it is hard to Distinguish him from one of the Faculty Sports.

Stetson, Howard Carlton, "H. C.," $\Phi K \Sigma$, Auburn
Edward Little High School. Civil Engineering
Class Treasurer (1); Class Executive Committee (1), (2);
Sophomore Prize Declamations (2); Class Calendar Committee
(2); Mandolin Club (2); Banjo Orchestra (2); Vice President
Twin City Club (3); President Twin City Club (3); Junior
Exhibition Speaker (3).

When H. C. came to college he was green but popular. He is still green.

Stevens, Albert William, "Bert," $B \Theta \Pi$, Belfast
Belfast High School. Electrical Engineering
Class Track Team (2); Varsity Track Team (2).

Steve is a standing reproach to most college men. He works nights, plugs days, and in the meantime turns out for track and trains as faithfully as the next man. His life is one strenuous strenuosity.

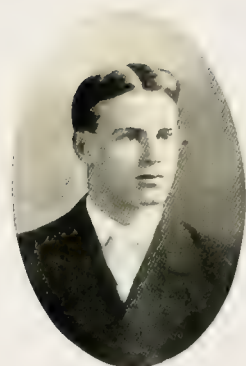

Stone, William Elmer, "Bill," $\Phi K \Sigma$, South Brewer
Brewer High School. Mechanical Engineering
Class Football (1), (2); Varsity Football (3); Ivy Day
Marshal (3).

While Bill is not a shark naturally he seems to be bearing up well in psychology and bids fair to escape on ninety. He is so weak and defenceless that we refuse to roast him further.

Sturtevant, Walter Linwood, "Pin," B © II, Bangor
Bangor High School. Chemical
Class Vice President (2), (3); Class Executive Committee
(2), (3); *Campus* (2), (3); Managing Editor *Campus* (3);
PRISM (3); Secretary Athletic Association (3); President Chemi-
cal Society (3).

Pin, just at present, is our leading hot air merchant. He gets his stock in trade from anybody and everybody who will furnish it free and sells it at two dollars a year in the *Campus*. His keen business head makes him one of our class and college standbys.

Swift, Porter LaForrest, "Port," Φ K Σ, Norway
Norway High School. Mechanical Engineering
Class Track Team (1); 'Varsity Track Team (2); Aid Sopho-
more Hop (2); 'Varsity Football (3); Aid Junior Promenade (3).

Porter barely escaped from Norway in time to avoid being made president of that country. In his hasty departure he took only a nightshirt and a short cut across the cow pasture which accounts for his marked propensity for sleeping.

Talbot, Richard Foster, "Dick," Σ A E, Andover
Hebron Academy. Agriculture
Class Football (1); Class Basketball (1), (2); 'Varsity Foot-
ball (2), (3); 'Varsity Basketball (2); Ivy Day Curator (3).

During the three years that Dick has been with us he has helped to advance to victory both his class and college colors in many a hard-fought athletic contest. The trials of rural life balance the monotony of easy victories.

Tate, Edith Mabel, "Polly Prim," Δ Σ, East Corinth
Bangor High School. Scientific
Class Nominating Committee (3).

Mabel's greatest ambition was to be popular with the male contingent of '07, and she has succeeded beyond her fondest dream. Already Hank has succumbed and with good luck she will capture another stray heart ere she graduates.

Tebbets, Charles Bucknam, "Teb," Auburn
Edward Little High School. Civil Engineering
Class Nominating Committee (3).

Teb believes in making haste slowly and in taking lots of time before and after all such painful operations. He is only one among many who share the belief.

Totman, Arnold Washington, "Tot," K Σ, Fairfield
Coburn Classical Institute. Civil Engineering
Class Baseball (1), (2); Class Treasurer (2); Class Executive
Committee (2), (3); Treasurer Somerset County Club (3);
Assistant Business Manager PRISM (3); Assistant Manager
Basketball (3); Chairman Junior Week Committee (3); Chair-
man Class Nominating Committee (3); Class President (3).

Those who took Tot for a green one were soon disabused as he always manages to work into his conversation sooner or later, "When I was in Washington, D. C., last time." For his further achievements see "Autobiographies of Great Americans."

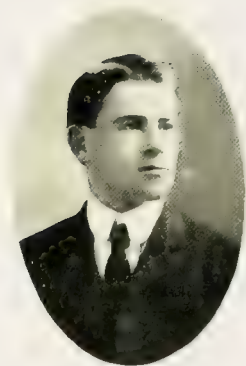

Tremaine, Arthur Edward Montague, Halifax, N. S.
Halifax Academy. Special

George Henry the Second has proved to be a much smoother and improved edition than the original, whose absence from this list of juniors causes our editorial pen much regret. Not that the resemblance is more than skin deep — for we would not spring that insult on our bitterest enemy.

Washburn, Willis Flye, "Smutt," A T Ω, China
Coburn Classical Institute. Chemical

Smutt is the most incurable case in college. When he came here he was the most pronounced victim of the tobacco habit we could show, and he is still on exhibition. This is the only recreation he has to break the monotony of hard plugging.

Weld, Moses Waldo, "Doc," Oldtown
Oldtown High School. Mechanical Engineering

Doc's college career has extended over quite a number of years, but it is he who will have to pay the bills, so we don't kick on that score. What we do kick on, however, is the fact that he has belonged to the locker room gang longer than his allotted time, and he ought to get out.

Whipple, LeRoy Francis, "R. F. D.," K Σ,
Pawtucket, R. I.
Pawtucket High School. Special

R. F. D. is majoring under Johnny Aubert, and this is enough to give him a free pass into our confidence. Of late he has been going to the post-office a little too often, but that is a disease that we have all had at one time or another, and we predict that he will get safely over it.

Williams, Benjamin Franklin, "Ben," A T Ω,
No. Islesboro
Coburn Classical Institute. Civil Engineering
Class Baseball (2); Assistant Manager Track Team (2);
Manager Track Team (3).

Known in prep. school as the "pretty boy," a distinction which has not troubled him here to any extent. He is a staunch advocate of dual meets and arranges one almost every night during the "dear season."

Wilson, Elmer Josiah, "Cracker," Σ X, Lynn, Mass.
Lynn Classical High School. Electrical Engineering
Class Track Team (1); Glee Club (1), (2), (3); Business
Manager Musical Clubs (2); President Musical Federation (3);
Business Manager PRISM (3); Junior Week Committee (3);
Chapel Choir (3); *Campus* (3).

As Cracker has promised us of the PRISM a peanut drunk if we are good, and if the PRISM comes out Junior Week, we shall pass gently by in order not to disturb any of the dark shadows that hover about his college career.

Wilson, Jesse Dana, "Jesse,"

Brunswick

Brunswick High School; B. A., Bowdoin '03.

Civil Engineering.

Jesse has already given us many proofs of his sagacity. In the first place he started in right by taking the man's course and secondly he immediately took a deep interest in college activities, being a member of the locker room gang and a regular attendant at all its meetings.

Witham, Lester Clyde, "Bowen," Δ M, North Anson

Anson Academy.

Civil Engineering

While Bowen Sr. has left us, Bowen Jr. still remains to carry on the good work of research and discovery. Among other things Bowen has discovered that the specific gravity of H_2O should be .72 instead of 1, and that he is eminently fitted for the position of Poker Fiend on Carrie Nation's Band Wagon.

Wyman, Abel Percival, "Ponto," Σ A E, Skowhegan

Skowhegan High School.

Civil Engineering

Class Track Team (1), (2); Class Relay (1), (2); 'Varsity Track Team (1), (2); Holder Quarter Mile Record (1), (2); Captain Class Track Team (2); 'Varsity Relay (2); Worcester Team (1), (2).

In Ponto we behold a living example of what a college career will do for a man. In the popular quarter miler there is scarcely the least remnant of the green and awkward freshman of three years ago.

York, Verne Jerome, "V. J."

Berlin (N. H.) High School.

Class Nominating Committee (3).

Bangor

Electrical Engineering

V. J. is that sort of fellow who plugs for the love of plugging and then plugs some more for the experience to be derived from it. When V. J. does not know anything it is useless to pass the question on—it was not in the book.

COLLEGE OF LAW

Bangs, Harry Edgar, "Bung," A E P, Freedom
Freedom Academy.
Republican Club, Executive Committee (1); Assembly;
Class Executive Committee (2).

"Bung" was a barber; could shave 'em close without a "hack," but he decided to study law so he could "skin 'em" scientifically.

Buckley, John, "Buck," A E P, Union, Conn.
Hitchcock Academy, '04.
Republican Club, Class Vice President (2).

What change ■ brief twelve month hath wrought! When "Buck" arrived he was the embodiment of all virtue, but the change has been swift and sure. 'Tis true he does not "hit the pipe," and he drinks nothing stronger than "Monogram," but this appearance of virtue cannot conceal his true character.

Clark, Jerome Borden, "Cindy," A E P, W. Gouldsboro
Cherryfield Academy, Fryeburg Academy, University of
Maine.
Assembly, Executive Committee (1); Vice President (2);
Class Treasurer (1); Republican Club.

Cindy can whistle "Blackstone" backwards. Wonderful is his knowledge of the law (as it was two hundred years ago.) Don't you care "Cindy," some men would give ten years of their lives to acquire your nasal hue, without having drunk a drop.

De Wolfe, Robert William, "Bob," Σ B II, Portland

Portland High School, 1904.

Republican Club, Secretary, President, Treasurer (1); Class Executive Committee (1); Baseball (1); Basketball, Assistant Manager (2).

Thrice did Caesar spurn the proffered crown, yet who will say that Caesar was not ambitious. Bob's fighting weight is 104, but we are unable to say whether it is caused by over indulgence in social functions, or by the overwhelming sense of his own importance.

Dudley, John Perley, "Jack," Σ B II, Δ K E, Mapleton

Ricker Classical Institute, Colby College.

Assembly; Republican Club, President (1); Class President (2); PRISM (2); Baseball Manager (2).

Hailing from the land of snowdrifts and big potatoes, "Jack" has acquired a very modest reserve, which will no doubt handicap him in the pursuit of his profession.

Keegan, John Joseph, "Jack," A E P, Lubec

Lubec High School, 1903.

Law School Baseball (1); Manager Law School Basketball (2); Class Secretary (2); Democratic Club.

"Jack" must have arrived in this world very suddenly, as he seems to have been called by the first names to suggest themselves to the mind of a fond parent. But be thankful "Jack" that they did not stick on another name, as was done to "Happy" and "Cupid," for in your case it probably would have been either Jeremiah or Jehosophat.

Lewis, Charles Goodell, "Dickey," Σ B II,
New Bedford, Mass.
Benton's Business School.

God might have made a bigger liar, but the fact remains, He never did. The reason for this is due in a measure to the fact that he was named for a "Methodist minister," but the degree of perfection which he has attained in this line is no doubt due to constant practice. If Ananias ever heard that story of the "flying fish" he would say at once, "The drinks are on me."

Monroe, Edward Roy, "(—)" A E P, Portland
Portland High School.

This man is all right in spite of the fact that he originated in a city noted for its heavy debt and poor rum. But he has somewhere developed the idea that an instructor should be able to answer anything outside of his "subject," from the ejection of Adam from the "Garden," to the constitutional justification of the Sturgis bill.

Moore, Charles Dana Clift, "Cupid," Σ B II, K Σ ,
Lynn, Mass.
Lynn High School.

Assembly; Republican Club; Varsity Football (1), (2); Varsity Basketball (1); Law School Baseball (1); Basketball (2); Class Executive Committee (1).

This man is also familiarly known as "Fat," though some call him "Alphabet" for short. Of course he isn't to blame for his name. In fact we think it has had much to do with his physical development, for no doubt his sturdy three hundred pounds have been developed by the vigorous exercise necessary for carrying about so many names.

Perry, Lawrence Swift, "Testy," Σ B II,
New Bedford, Mass.
New Bedford High School.
Assembly; Republican Club; Massachusetts Club.

"Testy," alias "Taurus Orientis" is our second specimen from "Whaletown." He achieved notoriety from being one of the three who passed Brooks' first exam, and though he has managed to live it down, he has now made himself irredeemably hopeless by pulling one hundred in Suretyship. "Ten-twenty-three" and High school maidens are his favorite pastime.

Finnigan, James Patrick, "Jim," Σ B II, Bangor
Bangor High School.

We had a good one on Jim about that dance at Holden, but somehow he "got on" and came up with a box of cigars if we would "cut it out." The spirit of graft prevailed, and as a result "Jim" can henceforth be certain that his doings on that occasion will never be revealed.

O'Halloran, Thomas Henry Gleason, "Happy," Σ B II, A T Ω, Marlboro, Mass.
Worcester Academy, University of Vermont.
Assembly; Democratic Club; Massachusetts Club; Class Vice President; Law School
Baseball (1).

It is almost a wonder that Maine doesn't sink and Massachusetts "flip up" when "Happy" and Cupid leave their native "burgs" for Bangor. The only reason why this does not happen is that "Happy" very suddenly develops an inexhaustible supply of "hot air" upon arrival, which no doubt has a counteracting effect. "Happy" has been requested to allow the instructor ten minutes out of each hour for the benefit of the remainder of the class, but whether he will be able to comply with the request remains still undecided. Incidentally we might say that if any person is going about the world nameless, we would refer him to "Happy" or Cupid, from whose inexhaustible supply he will no doubt be able to fully satisfy himself.

FORMER MEMBERS OF 1907

FRANK SAMUEL ALLEN,
JOHN ATWOOD AMES,
FLORENCE GLADYS BEALE,
CHESTER HOWE BEAN,
ARTHUR LAWRENCE BEEDLE,

ROLAND-REJOICETH IN THE GLASSING OF HIS HEART

THE SOPHOMORE

SOPHOMORE CLASS

OFFICERS

President, ARTHUR SNOW HANSCOM.

Vice President, CLAUDE BOYLE.

Secretary, BELL CURRY HARRIS.

Treasurer, LESLIE WHEELER SARGENT.

Executive Committee.

ARTHUR SNOW HANSCOM,

BELL CURRY HARRIS,

DANIEL CHASE,

CLAUDE BOYLE,

LESLIE WHEELER SARGENT,

JAMES ADRIAN GANNETT,

HOWARD DOUGLASS YATES.

CLASS YELL: — *E - I - G - H - T, Rah!*

E - I - G - H - T, Rah!

E - I - G - H - T, Rah!

Nineteen eight!

Rah! Rah! Rah!

Boom! Ought eight!

CLASS COLORS: — *Dark Red and Blue.*

HY! Hello, Squire."

"Hello, Bill."

"I'm deuced glad to see you. How's the body?"

"Never better. And how are you?"

"Fine. When did you come to New York?"

"Got in this morning. Didn't have anything to do this evening, so thought I would hunt you up."

"Glad you did, 'old boss.'"

"I see that you are still keeping bachelor apartments. Why don't you get married?"

"Don't have to. Having a good time as it is. You hitched up yet?"

"No."

"Sit down and have a cigar. How's everything in the old Pine Tree State? It's been twelve years since I was there, and I've lost run of things."

"Well, everything is about the same as it was when our class entered the University as the greenest bunch up to that date. How the sophomores rubbed it into us that first term! Were you in the night-shirt parade?"

"Sure thing. They couldn't get along without me."

"What a march that was down across the bridge! Then that scrap in front of the hotel! Did you get away from them then?"

"I surely did. Ran as if the Devil himself was after me."

"The ball games made us feel a little better, and showed that we had some good stuff in us, after all. Ami French and Hiram Dow pitched 'em over the plate so fast that they looked like humming birds' eggs."

"Then the scraps — let's see — they won the flag scrap rather easily, but considering our lack of men we put up a good fight. But where they had the hold on us was in the 'razoos.' Weeks at a time I wore cotton batting in my pants so that I could be comfortable when I sat down. And then came the Indoor Meet and the tug-of-war with Hanscom, Big Smith, Hussey and Hoyt on the rope. Didn't we make things interesting with that gang?"

"Dan Chase made a good leader for us that year, didn't he? He made

only one mistake and that was in allowing us to attempt a banquet at Ellsworth. What with the "razoo" that the sophomores gave us, and getting left in Ellsworth, and taking our examination on Saturday, we had to travel a hard road."

"The best time I ever had was in the Frog Pond Scrap. We met behind 'Prexy's Hall for Incurables,' you remember, and rushed down to the pond in a body. It was a pretty even scrap, and when nearly everyone in both classes had been thrown in, '07 and '08 buried the hatchet."

"When 1909 showed up we didn't have to scrap; there was no need of it. We had only a small class, but we took everything in sight—flag scrap, baseball games, (green peanuts we should have had if the freshman hadn't been so slow as to let the juniors and seniors swipe them), and we warmed up a few of the freshies, too, when it seemed necessary to start their circulations."

"It was more fun being a sophomore and showing someone else how to do the work than it was—Hello! What was that? Twelve o'clock? I must be going. My wife is down at the 'Waldorf,' and she will give me the devil if I don't get back early."

"I thought you said you weren't married."

"Sh! She used to be a co-ed. She might hear that I denied it. Come down and call on us to-morrow. Good night."

"Good night."

MORTON HOWARD RIDEOUT, EDGAR JAMES EMERY,

HARRY BURTON GREELEY.

BODY of one hundred and thirty brawny, innocent "fresh-men," blending over the border into the shade of deep green, we came to Maine in 1905 from the fertile farms of all New England. We came, we saw, but we conquered nothing. Before leaving the old homes we were provided freely with one of the big catalogues of the University which has been continually before us, and by the aid of which we easily figured out the very low expense which would be incurred in acquiring the training necessary to determine our future happiness in tilling the soil. As each of us had one of these useful guides in our pocket we had little difficulty in finding the farm after being dropped from the train at Orono.

Although almost all of us were suddenly taken homesick after arrival we survived fairly well and only a few returned home to continue the old chores with father. We were much surprised, after becoming acquainted with some of the old men, to learn that their expenses had been such enormous sums. We decided to stay a while, at least, but did not dare to let father know what a great burden his son would be.

Another surprise also came when we learned that only a few, comparatively, of the upper classmen were pursuing courses in agriculture, but instead were taking engineering courses. Desiring to be with the boys we decided to become engineers also (although awful afraid to ride on the engines) and immediately took up those hard studies such as solid geometry and English without even letting the folks at home know of the radical change.

The fellows in college had a good deal of sport with us during the first term. The sophomores, especially, were very attentive and strict, for instance, not even allowing us to paint the standpipe in a body, but instead made us run the gauntlet times innumerable. Upon the football field was where we were used to the best advantage, making good material for tackling purposes and to fill up holes in the line.

But above all, the worst that we had to endure was the obedience of the strict rules of the proclamation of our elders. One of its hardest conditions was to refrain from being in company with the girls, especially our own "co-eds,"

to whom we were so devoted. It was hard because at home it was always our greatest pleasure, once or twice a year, to go home with the country maidens from the husking bees.

But now the year is over, and we cannot but feel thankful. With the exception of the few wounded ones we have come out of the battle as well as could be expected and will fortify during the summer in preparation for the second year's struggle.

The Schools and Colleges
of the
University of Maine

O the College of Arts and Sciences belong thirty members of the University faculty and one hundred members of the student body. In this college are comprised the following departments of instruction:—Biology, including Zoology, Botany, Geology and Physiology, Civics, Chemistry, English, German, Greek, History, Latin, Mathematics, Philosophy and Education, Physics and Romance Languages. The degrees granted are the degree of Bachelor of Arts, the degree of Bachelor of Science, and the corresponding Masters' degrees.

This college affords opportunity for a general education and for specialization along literary and scientific lines. After completing a comparatively small amount of prescribed work, the student may elect such major and minor studies as will serve to prepare him for his future vocation. Those intending to become teachers; to enter schools of law, medicine, or theology; to engage in journalism, business life, or the government service; or to pursue scientific investigation, will all find in the various departments of this college studies suitable to their needs.

Those intending to become teachers may in this college prepare themselves for the work by a general education and by such specialization as seems adapted to their abilities and future needs. Of the many subjects open to election they may concentrate effort mainly upon one subject, or they may prepare themselves to teach two or three related subjects. Special attention may be called to the

courses in education and to the excellent facilities for those desiring to fit themselves to teach language, mathematics, or science in the schools.

Students who intend later to study law may so regulate their choice of studies as greatly to aid them in the work of the law schools. To such students the courses in history, civics and English afford special advantages.

Students planning later to study medicine will be aided toward their future work in the medical schools by the various courses offered in the departments of pharmacy, chemistry and biology.

Theological students may elect from the department of philosophy such courses in philosophy and education as are especially helpful. Large opportunities are also afforded by the different departments of science and by the courses in English, history and foreign languages.

Students intending to devote themselves to journalism find their needs met by the courses in english composition and english literature and by courses in foreign languages, civics and history. There are also opportunities for practical journalistic writing.

Those who purpose to engage in business life will find opportunities for the requisite general education and for such specialization as seems adapted to their taste and future needs.

Those who desire to prepare for positions in the government service are afforded excellent advantages in the departments of mathematics, physics and chemistry, and in the various courses in agriculture, forestry and engineering, offered by the other colleges of the University.

Students desiring to prepare themselves for scientific research find the requisite facilities and skilful instruction in such subjects as mathematics, physics, chemistry and biology. The work of the Experiment Station is also of interest and aid to such students.

To the special opportunities in the College of Arts and Sciences already mentioned may be added the general advantages of the various literary, music, art and social clubs and organizations, the student publications, the library facilities, and—perhaps most important of all—the general educative and broadening influence exerted by the presence of the other colleges of the University.

THE College of Agriculture consists of three departments—Agronomy, Animal Industry and Horticulture. The instruction is divided between college courses leading to B. S. degree and extension courses which consist of the Two Years School Course of non-collegiate grade, the Short Winter courses, and the Lecture, Reading and Correspondence courses.

The Department of Agronomy offers eight courses in soils and soil analysis, agricultural engineering, farm mechanics, fertilizers, field crops, history of agriculture and advanced work.

The Department of Animal Industry offers eight courses in animal breeding, feeding, stock judging, dairying, sheep husbandry, poultry raising and advanced work.

The Department of Horticulture offers nine courses in general horticulture, fruit growing, vegetable and ornamental gardening, greenhouse management, pomology and advanced work.

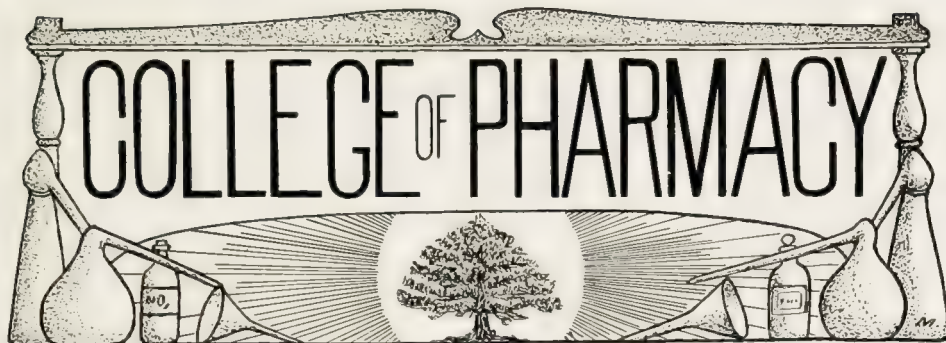

The extensive farm and its equipment, large barns, dairy building, poultry plant of the Maine Experiment Station, the orchards, gardens, greenhouses and other laboratories, give this college a good equipment for the teaching of modern agricultural methods.

The extension courses have during the past year been greatly developed and are now very popular with the people of the State.

The chief objects of the college courses are to train professional agriculturists fitted both for scientific and practical work, and of the extension courses to train practical men.

To the young man who has a love for the natural sciences, the various lines of agriculture offer fine opportunities for the application of these subjects in both practical and scientific work.

IN every State in the Union there are now statutes requiring those wishing to become pharmacists to appear before duly constituted State boards for examination to prove fitness for the practice of their chosen profession. These examinations are in general thorough and searching, being conducted by able and experienced examiners, skilled in their art, and who are usually also in some measure charged with an oversight of violations coming under these statutes. The legal requirements are intended to prevent compounding and dispensing by the incompetent; and to the extent that they are enforced and, excepting the customary legal exemptions in favor of those who were in business before the statutes went into effect, they certainly effect their purpose as fully as other similar restrictive legislation. To meet these requirements and standards — constantly advancing — as well as to prepare for new and advanced methods in the calling itself, — involving familiarity with the rapidly accumulating material of the "newer remedies" — largely of German synthetic organic origin — a much longer, higher and more thorough preliminary training than formerly is now requisite in order to fit the beginner in pharmacy for his future duties.

This fitting, it is becoming increasingly more difficult, if not impossible, to obtain as formerly sufficed, within the store itself; hence of later years the great increase in the number of private instructors, of correspondence schools and courses, and of colleges of pharmacy, — the latter either independent or organic parts of the older universities. Also the increase in number and in efficiency of health boards, problems of disinfection, pure food and drug laws, sanitation laws, and the new feature of educational pre-requisite laws, just coming to be

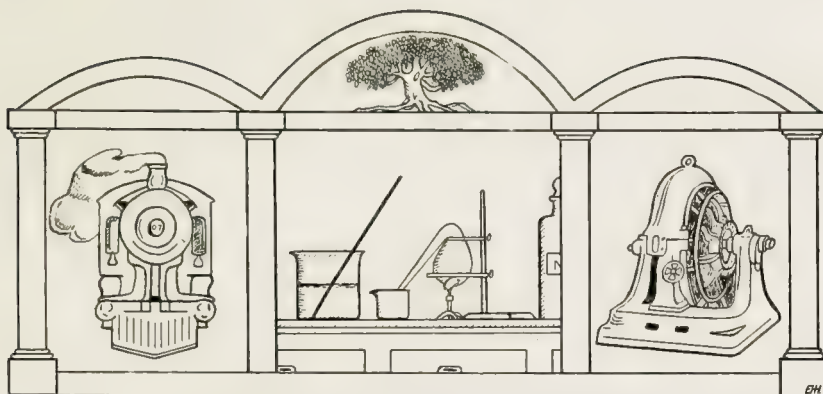

introduced,—all making imperative, even for self protection, a knowledge of quality and identity of the products handled that was not dreamed of by the druggist of one or two decades ago. This higher fitting is then imperative even if we ignore the obvious ethical demand—that he who would presume to compound powerful or dangerous chemicals for the sick shall know his business. For the quarter century past, it may have been fairly claimed that to really know his business the druggist should be even more of a chemist than the chemist himself,—i. e., more broadly and thoroughly trained than the average analyst; but if there ever was a doubt of it there is none now.

In addition, the druggist sees a new claimant arising in the form of the modern serum therapy, and other applications of the latest science, bacteriology. There is no alternative then but that the pharmacist of the next and future decades must be more broadly and thoroughly trained than any of the preceding, or find, with Othello, his occupation gone.

Incidentally, too, the public is getting better informed, knows better what it wants, and feels more like getting it. Under the tutelage of such instructors as Mr. Bok of *The Ladies' Home Journal*, and Mr. Adams of *Collier's Weekly*, it is learning some things it has long needed to know, but which the public press has not heretofore deemed prudent to reveal. Never before has the resistless power of public opinion been more, if as strikingly exemplified, as in the year just closed. All these signs of the times are of deepest consequence to the unfitted pharmacist who in them—not less than the ward heeler or corrupt legislator—may read the doom of his reign of "graft" and incompetence.

The rationale as well as plan and scope of the College of Pharmacy in a very general way may be gathered from the foregoing. It is to fit the future pharmacist broadly and adequately for his calling, as it may and must be practiced to meet the demands alike of advancing public conscience and of the ascertained truths of modern medical and chemical science.

COLLEGE OF TECHNOLOGY

It is well known that, during the past ten years, there has been a steady increase in the number of students in attendance at the University. It is also thought by a great many that this increase extends principally to the College of Technology. That this is not true is well shown by the following figures showing the relation between the numbers in the three engineering departments at the University. During the year 1894-5 67.9 per cent. of the total registration were taking an engineering course. This ratio has fluctuated from that time to the present year between the limits of 54.5 per cent. and 68.6 per cent. and is now 63.7 per cent. This shows that not only has the steady growth applied to the College of Technology, but to the other colleges as well. At the present time the different engineering courses are divided as follows:— Civil Engineering leads with 45.5 per cent. of the total engineering registration; Electrical Engineering next with 37 per cent., and Mechanical Engineering has 17.5 per cent. It should be noted that in making up the above percentages the total in the University does not include the registration in the School of Law or the Winter Course in Agriculture.

Chemistry

THE contribution of the Department of Chemistry to the College of Technology is the Chemical course, soon to be followed by the course in Chemical Engineering. The field of applied chemistry is so large that the most that can

be done in a four years' course is to get a thorough grasp of the fundamental principles, and then a little glimpse into the most important subdivisions.

Since the first place a young chemist gets in any line of technical work is almost invariably that of a quantitative analyst, the most time is spent in preparation for, and study of this most important work. Two years of general chemistry and one of qualitative analysis before the quantitative balance is touched seem long in prospect, but in retrospect, this careful preparation, flanked and supported by language and mathematics, is appreciated more truly, and the appreciation grows as more specialized study shows the constant dependence of all the great superstructure upon the few and simple principles studied in the first two years. Technical work commences in the third year with the study of the various methods of accurate analysis; first of simple, and later of more complex substances, closely approaching the problems of the commercial chemist. At the same time the subject of organic chemistry is started, and although this has to be studied in the scientific rather than the technical manner, especial emphasis is given to those compounds which are of commercial importance. The work in Biological Chemistry serves as an introduction to the study of human and animal foods and their proper analysis and valuation — a problem of increasing interest and importance — two special divisions of which receive more detailed attention in the senior year under agricultural analysis and toxicology. A necessarily brief course in assaying gives a glimpse at the particularly difficult and delicate problems of the mining chemist and the special methods for their solution; while a correspondingly short course in dyeing shows in the same general but fundamental way the problems of the chemist who would give us "fast colors." A broad review of industrial chemistry in its many applications extends throughout the last year, giving time for quite a detailed study of the important features of the many industries which are successful or not, just as the chemist in charge has or has not the training and ability to solve quickly and correctly new problems which constantly arise, and which although of some small detail, may be of tremendous financial importance.

The student in the Chemical course, like many in the other technical courses, generally gives quite a little of his elective time to work in the Department of Civics, realizing the necessity of any professional man knowing something of the principles which underlie and regulate the social fabric in which he is to be an important factor. Thus fitted the graduate is ready to start in almost any line of chemical work, as is amply proven by the positions held by our graduates; for we have graduates in experiment stations, as professors of chem-

istry, as chemists in iron and steel works, in government work, with electrical companies, and as sanitary chemists.

Civil Engineering

THE course in Civil Engineering has been planned with the object in view of laying a firm foundation in the principles, both theoretical and practical, upon which the profession depends, so that on graduation the student may be fitted to apply himself at once to engineering work. It is a common complaint among engineering students that their course is too theoretical with too little that is practical. To such students the reply should be made that while in order to become a successful engineer he must be practical, he must also have the theory to go hand in hand with his practical knowledge, and that the place to obtain this theory is during his college course. He will have a lifetime to devote to obtaining the practical side. There is so much to learn, and the time commonly spent on the college course is so short, that the course is necessarily theoretical, but at the same time the attempt is made to acquaint the student with the best engineering practice. A student must not think that, just because he does not become an expert instrumentman at the end of his course in plane surveying, the institution is at fault, for the course is not designed to make such an expert of him, but rather to give him the start whereby he may, with practice, become proficient.

The larger part of the students, after graduation, follow the profession in some one of its branches. Some follow the line of structural steel work, others go into railroad work, either construction or maintenance of way, others take up hydraulic engineering, while some after taking the Civil Service examinations, receive appointment and help to carry on the work under the government.

It is impressed upon the student that he must make up his mind to start his career in subordinate positions, with small pay at first, to obtain all the experience possible, while holding these positions, and to take as much interest in his duties as he would if more depended upon his work.

Not all men are adapted to follow civil engineering for a profession, and if this fact is learned early in life it is much better than to find it out after it is too late to begin over again. Thus if a student is clearly not fitted to carry the course it is doing him a kindness to make him realize the fact, although it may

perhaps seem rather hard at the time to him. At the same time some men who are not able to carry the work in four years, can do so in five, and become successful.

Mechanical Engineering

OPPORTUNITY for a student to become well acquainted with the nature of the work followed in any branch of engineering before deciding upon his course is frequently small and choice may be made before there is sufficient certainty of the suitability of such a course for his work. In such an event a change will likely be made from the unsuitable to the preferred branch of engineering. This change comes more often after than before graduation. Such being the case, it is more important that good fundamental training be given an engineering student than that specialization be carried to an advanced degree.

The Mechanical Engineering course is arranged with this fact in view and fundamental principles and courses, which tend to give the graduate greater adaptability are given precedence over specialization.

Clear thinking and the ability to decide quickly are of as much importance as detail information. Courses are being continually moulded to better develop this accomplishment. Courses are arranged to be continuous throughout and finally conclusive. Frequent exercises for a short period are preferred to exercises at wide intervals, but for longer periods, and in general, the attempt is made to avoid any serious interruption, such as often occurs, of the progress from the elementary to the advanced related courses.

Laboratory methods of instruction are used to the greatest possible degree, instruction by ocular demonstration being in many subjects most effective. To a great extent the efficiency and completeness of the laboratories will determine the value of the course. It is a matter of much satisfaction that the laboratories of the University are continually being improved.

The component courses in detail are described in the catalogue but attention may be directed to the fact that in many cases, modifications in the subject matter and methods of teaching it, which do not appear in the catalogue statement, have recently been introduced with a view to make the courses more efficient.

A considerable amount of time is put into shop-work, in which it is expected that a knowledge of the tools and action of material during construc-

tive processes will be gained. Further, by actual experience in the shop, one comes to appreciate the possibilities and restrictions of modern shop methods. This is of much importance to a man who has to design machinery to be built by others in the shop, and is the warrant for the amount of time put into this work. Similarly, in the drawing room and in the class room the work is adapted to the final needs of the successful engineer. An arrangement is made whereby those students having the time available, may elect between a course in marine engineering, embodying the elements of hull design and ship propulsion and a course in hydraulic machinery, involving work in theoretical hydraulics and water-wheel design, as well as a study of the common types of hydraulic machinery.

Electrical Engineering

THE Electrical course at the University begins with the discussion, expansion and application of fundamental physical facts; the facts themselves are presented, the relation of one to the other is shown, the production of direct current and alternating current systems is traced from these elements, the operation and finally the construction of electrical instruments, apparatus and machinery are built up with the ability to handle those physical facts along with a knowledge of the mechanical principles of construction.

Following this recitation work, the laboratory is used to bring these fundamental principles and their application clearly to the notice of the student; also the laboratory affords an opportunity for the student to apply his theoretical knowledge, to give practical experience in the operation of generators, motors, instruments, lighting apparatus, etc., and to give practice in writing detailed reports on engineering subjects. This last item is considered one of the most valuable opportunities in connection with the laboratory work; it being recognized that the ability to state his ideas clearly and concisely in a report systematically arranged is of prime importance to the engineer; and such should become second nature to him, as much so as in using arithmetic with ease.

A part of the course, in the senior year, consists of the design of electrical apparatus and machinery. This work requires a complete working knowledge of the fundamental physical facts referred to, good judgment on the part of the designer, and a reasonable amount of good uncommon sense. This design

work brings out just what kind and quality of material any particular student is made of; is he a good worker, does he lack courage and grit, has he good judgment in balancing cost of material against cost of labor, and can he handle difficulties appropriate to the circumstances and finances at hand. If he cannot, it is the work of the Department to assist him in developing a capacity to meet these requirements with as great efficiency as possible, in order to approach the position of a successful engineer.

Forestry

A COMPLETE undergraduate course in Forestry is offered at the University, which may serve not only as the basis of practical work in forestry, but also of a liberal education. The course comprises lectures, recitations, laboratory work, and a large amount of field work. The University is well equipped to meet the needs of this course, and every year the seniors in the course go off to the various lumber camps in order to get reliable knowledge as to the practical management of forests.

Professor Tower has taken up the work where Professor Spring left it, and the course is an exceedingly promising one.

ollege of Law

FOR several years before the Law School of the University was established, the writer, from his interest in legal studies and from his appreciation of the need of such an institution to assist the young men of this State to meet the steadily increasing demands made upon them for admission to the Bar, had studied the conditions and had endeavored to formulate some plan whereby a successful law school might be established in connection with the University of Maine.

In this "preliminary survey" General Charles Hamlin of Bangor, then Reporter of Decisions for the Supreme Judicial Court of Maine, a strong friend and a former trustee of the University, gave invaluable information and advice; indeed, without the aid and encouragement derived from this source, these early plans might never have been realized as facts.

After matters had been thoroughly canvassed, definite knowledge of conditions been secured, and ideas had become crystallized, the proposal to establish a law school and the arguments in favor of it were laid before Dr. Harris, then president of the University. Dr. Harris with his usual sagacity at once endorsed the proposal and set about to carry it into effect. At his request a meeting was called at the office of General Hamlin. This meeting was attended by a good number of the leading lawyers of Bangor and vicinity, the Hon. Henry Lord, Dr. Harris, and the writer of this article representing the University. All present were heartily in favor of the proposed school, and

whatever doubts may have before existed in their minds as to the need and feasibility of it were removed by the discussions that took place.

The Board of Trustees of the University at its meeting held shortly afterwards, was by no means unanimous in favor of the scheme, but the never-failing tact and persuasiveness of Dr. Harris prevailed in this as they have prevailed and continue to prevail in so many other situations.

The establishment of the law school having been finally determined upon, on March 9, 1898, Professor George E. Gardner, then Professor of Law in the University of Illinois was elected as its Dean by the Board of Trustees, and a better selection could not have been made. Professor Gardner was a close student, profoundly versed in the law, and of a forceful and attractive personality. As a teacher and as a man among men he was straightforward and unpretentious, commanding the respect and admiration of his students and of all who came in contact with him by his frankness and honesty no less than by his great learning and ability.

The School, which was located at Bangor so that the students might have the advantage of the large law library there and also the opportunity of attending the sessions of the courts, opened in the fall of 1898 with an attendance of about twenty; this was increased during the year to twenty-six. Under the direction of Professor Gardner it at once secured recognition from the legal profession of the State and entered upon its successful career. That the career of the Law School of the University of Maine has been a successful one is shown by the steady increase in the number of its students and by the fact that its graduates have compared favorably with the graduates of older and larger law schools both in the matter of creditably passing the Bar examinations in different States and in success in professional work.

Early in the year 1902, Professor Gardner was elected Professor of Law in the Boston University Law School, and on March 4, he resigned his position here. He left us at the close of the college year carrying with him the best wishes of all who had been associated with him, whether as colleagues or as students, and, it scarcely needs to be said, he bears the same high reputation in his new and broader field of labor that he merited and enjoyed while in Maine.

For the year of 1902-03, Professor W. E. Walz acted as Dean of the Law School in the place of Professor Gardner, and in the summer of 1903 he was elected Dean, which position he has since held.

That the Law School has met a need of this State is now fully recognized; that it has done good work for the young men who have been enrolled as its students is beyond question; it remains now to associate it more closely with

the parent institution. Unfortunately the fact that the Law School is located eight miles from where the greater part of the educational work is carried on has a tendency to create the feeling that the School is an appendage to the University rather than a constituent part of it, and certainly if this tendency has its effect and this feeling shall prevail to any appreciable extent among our law students and graduates the institution suffers a great loss ; its future depends in great part on the interest that those who receive their education here take in its welfare, and the members of the legal profession, perhaps better than any other class of men, are able to exercise an influence and to work strongly and efficiently in its behalf.

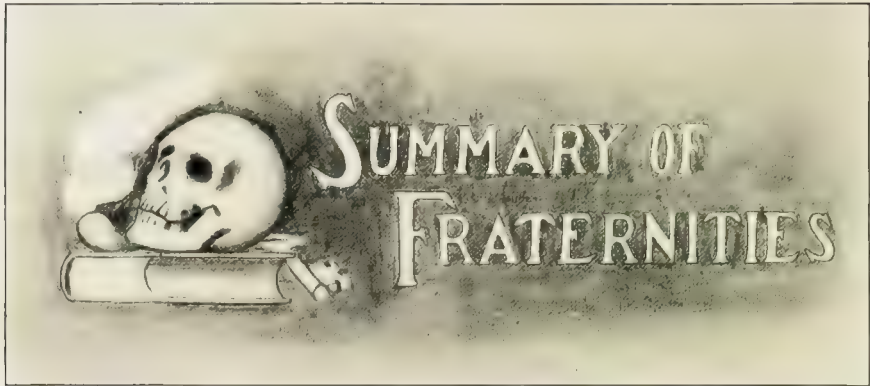

The library of the Law School is now ample to meet all but its exceptional needs, the advantage arising from its nearness to the courts has proved to be over-estimated, and the time is near at hand when the question must be carefully considered whether the welfare of the University as a whole, and of the Law School as well, does not demand the removal of the latter to Orono.

Here are the library, the laboratories, the lecture rooms, the lectures, and all the other surroundings and conditions of a great institution of learning, which of themselves are of the greatest advantage to the young man, especially to him who has not previously enjoyed a general collegiate training, while association with the other students, with the instructors in the other departments, and the life itself on the University campus tend to make him feel the more strongly that he is an integral part of the great whole, and to more certainly assure that for the future he will be what each and every graduate of each and every department of the University should be—A TRUE AND LOYAL SON OF MAINE.

SOCIETIES

UNIVERSITY COUNCIL

FACULTY MEMBERS

PRESIDENT FELLOWS,
DEAN HART,

DEAN STEVENS,
PROFESSOR BOARDMAN.

STUDENT MEMBERS

1906

ALBERT J. BUTTERWORTH,
EDWARD A. STANFORD.

CHARLES W. CAMPBELL,

1907

CARL H. LEKBERG,

THOMAS A. MALLOY.

The student council is the outgrowth of the cordial co-operation of the faculty and student body of the University. It is composed of four faculty members, three seniors and two juniors, and to it are referred all controversies between faculty and students. The council also endeavors to remove all causes which may lead to dispute or dissatisfaction. Through the council all faculty actions which directly concern the student body are adjusted in such a manner as to add to the general harmony.

Debating Club

President, ALBERT P. ROUNDS, '07.

Vice President, ROBIE L. MITCHELL, '08.

Secretary and Treasurer, HAROLD M. ELLIS, '08.

The Debating Club offers unexcelled opportunities for practice in public speaking and parliamentary law, and at the same time affords a liberal acquaintance with current events. Topics of wide public interest are discussed at the weekly meetings and each year a debate on some national issue is engaged in with some other college.

BATES DEBATE

LEWISTON, JUNE 3, 1905.

MAINE DEBATERS

ERNEST L. DINSMORE, '05.

ALBERT P. ROUNDS, '07,

CHARLES E. DAVIS, '07.

Alternate

EDWARD A. STANFORD, '06.

JUNIOR CIVIL SOCIETY

President, HORTON W. KIERSTEAD.

Vice President, ARTHUR R. LORD.

Secretary and Treasurer, LUCIUS D. BARROWS.

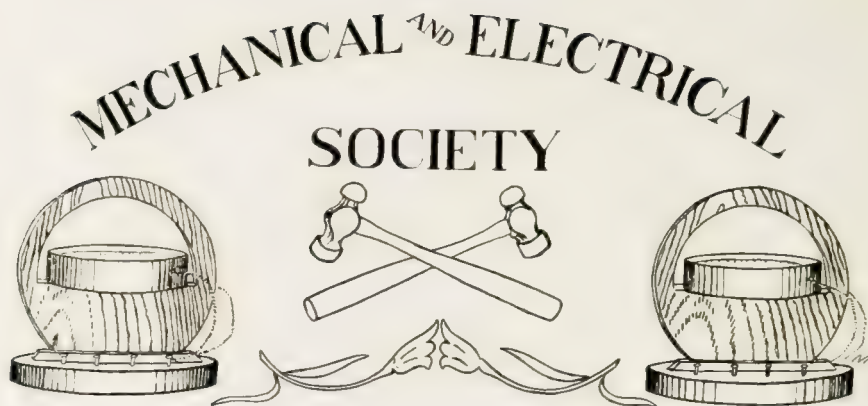

EXECUTIVE COMMITTEE

THOMAS A. MALLOY,

EARLE W. PHILBROOK,

EVERETT H. STETSON.

The Junior Civil Society is the oldest among the various technical clubs at the University. Its membership includes those juniors who are taking the Civil Engineering course and its meetings are open to all. The work of the society supplements the theoretical instruction of the class room in a most efficient way by furnishing lectures on the practical side of engineering by many of the foremost engineers and professors in New England.

President, CARL H. LEKBERG.

Vice President, LOWELL J. REED.

Secretary and Treasurer, JOHN T. BATES.

The Mechanical and Electrical Society is very similar to the Civil Society in aims and methods and includes members from the three upper classes in the Mechanical and Electrical Engineering courses. It provides weekly lectures throughout the winter and among its speakers are found many men of national and sectional reputation in their various lines.

THE ASSEMBLY

Founded in 1902 by the students of the Law School for the purpose of training its members in the art of debating.

OFFICERS

President, L. B. SWETT.

Vice President, J. P. DUDLEY.

Secretary, O. H. DUNBAR.

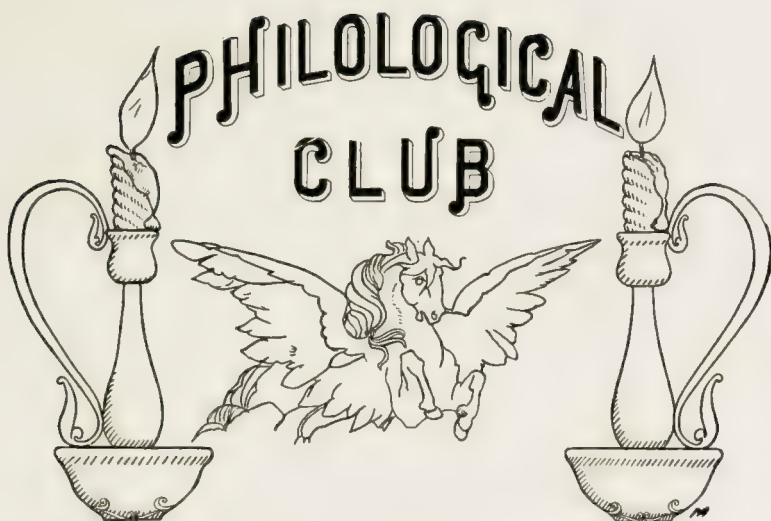

Treasurer, H. G. RIDLON.

EXECUTIVE COMMITTEE

R. W. DE WOLFE,

C. COTTON,

C. B. SKILLIN.

President, PROFESSOR J. H. HUDDILSTON.

Secretary and Treasurer, PROFESSOR G. A. THOMPSON.

The Philological Club is composed of those members of the faculty and student body who are interested in the higher study of languages. At its meetings members contribute the results of their original researches and the frequent lectures on great philological movements have awakened deep interest among the student body in general.

LITERATI

President, DANIEL CHASE, '08.

Vice President, ALBERT A. WHITMORE, '06.

Secretary, MARY F. WEBBER, '06.

Treasurer, WILLIAM D. HALL, '07.

COMMITTEES

Literature MERTON R. LOVETT, '06.

Art CAROLYN A. HODGDON, '06.

Music FREDERICK D. SOUTHARD, '06.

Drama MAUDE B. COLCORD, '06.

The Literati, or literary society, provides lectures and original papers on subjects pertaining to Literature, Art, Music and the Drama. Its membership is restricted to the faculty and students in the College of Liberal Arts and Sciences, but its meetings have attracted many from other courses who desire to acquire as liberal an education as possible.

PRESS CLUB.

President, PROFESSOR R. K. JONES.

Secretary, MINNIE E. CHASE, '08.

The Press Club is composed of those students who report the news of the University for the various journals and newspapers of the State. The members represent almost all the larger newspapers and a great many of the more local publications. The club forms a very important factor in moulding public opinion and at the same time affords a valuable training in newspaper writing.

THE CHEMICAL CLUB

President, WALTER L. STURTEVANT, '07.

Vice President, WILLIAM B. ALEXANDER, '07.

Secretary, ROBERT E. CLAYTON, '07.

Treasurer, FRED P. HOSMER, '07.

The Chemical Club offers advantages similar to those of the other technical clubs. At its meetings practising chemists are secured to speak on practical considerations in the chemist's profession and the members are assigned to report on the current chemical periodicals.

President, MISS JOANNA C. COLCORD, '06.

Vice President, ALBERT J. BUTTERWORTH, '06.

Secretary, LOWELL J. REED, '07.

Treasurer, CARL H. LEKBERG, '07.

The Deutscher Verein is a society established for the advancement of interest and knowledge of the German language and includes those who have attained to a sufficient proficiency in German. It provides lectures and papers on Germanic subjects and its meetings are also of a social nature. Each year a banquet is held at which the Vereins of the other Maine colleges are represented.

President, EDWARD A. STANFORD, '06.

Vice President, THOMAS H. REYNOLDS, '06.

Secretary and Treasurer, ALTON A. AUSTIN, '07.

One of the most active and effective among the technical societies is that composed of the students in the College of Agriculture. The object of the club is to promote an interest in modern and progressive methods of farming and to further this end the best agricultural authorities in New England are secured as lecturers and frequent trips to agricultural conventions are taken.

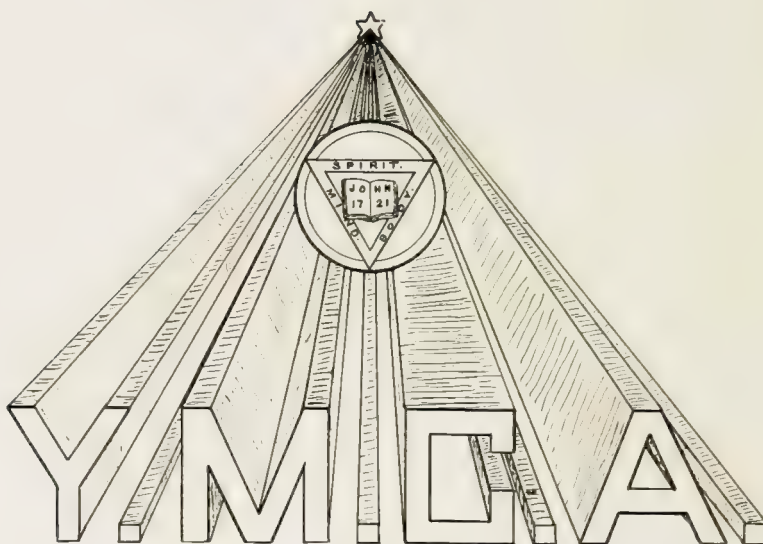

President, ALBERT J. BUTTERWORTH, '06.

Vice President, SIDNEY CASSEY, '06.

Secretary, JOHN T. KENDREGAN, '08.

Treasurer, LINCOLN CROWELL, '06.

The Massachusetts Club is the largest and most efficient among the various sectional clubs at the University. It includes all students from the Bay State and it aims to promote the interests of the college among the people of Massachusetts. It holds a banquet in Boston at Christmas and secures special excursion rates during the holidays and adds in many ways to the pleasures and convenience of Massachusetts students.

President, HOWARD L. CHURCHILL, '06.

Vice President, CALEB H. JOHNSON, '06.

Secretary, EDWARD A. STANFORD, '06.

Treasurer, LOWELL J. REED, '07.

COMMITTEES

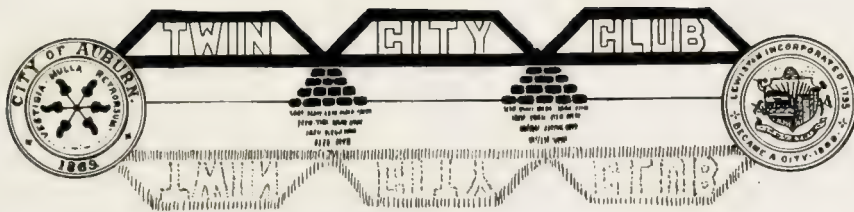

Membership..... RAPHAEL S. SHERMAN, '06.

Bible Study LOWELL J. REED, '07.

Devotional DANIEL CHASE, '08.

Lectures..... CALEB H. JOHNSON, '06.

The Young Men's Christian Association exerts a very helpful influence in the development of student character. Powerful speakers are often on its programme as well as much attractive musical talent. A course of Bible study is carried out in the fraternities in addition to the regular devotional meetings. Delegates are sent to the national, New England, and other Y. M. C. A. conventions.

President, HOWARD C. STETSON, '07.

Vice President, THOMAS A. MALLOY, '07.

Secretary and Treasurer, WILLIAM A. COBB, '08.

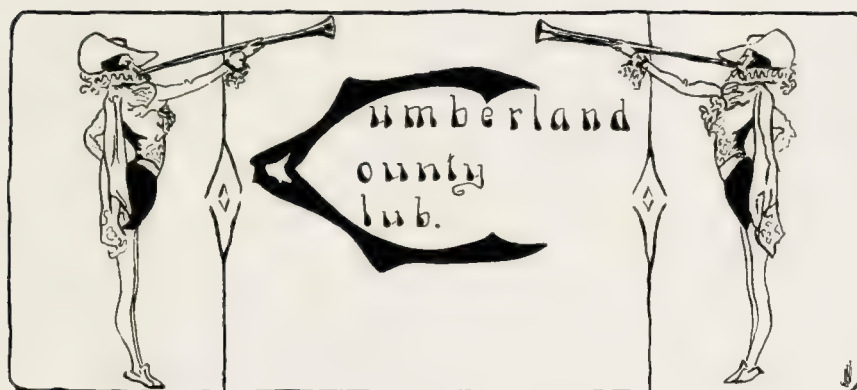

The various sectional clubs representing sections of this State—the Twin City Club, the Washington County Club, the Cumberland County Club, the Somerset County Club, and the Hebron Club—all serve to add to the enjoyment of students at the University and to spread abroad the name and fame of Maine throughout the State. The clubs also furnish many social features and exert a powerful influence in keeping the alumni in touch with their Alma Mater by means of the annual banquets held in many parts of the State during the holidays.

President, PHILIP H. GLOVER, '06.

Vice President, THOMAS H. REYNOLDS, '06.

Secretary and Treasurer, HOWARD B. CAPEN, '08.

President, JAMES G. WALLACE, '06.

Vice President, DAYTON J. EDWARDS, '06.

Secretary, CHARLES E. DAVIS, '07.

President, HARRY A. EMERY, '06.

CLASS ODE

Dear Alma Mater, now to thee
A song of love swells from the heart,
And for thy gifts, so rich, so free,
We thank thee, ere we shall depart.

Thou art to all our hearts so dear;
And while our words of hope we tell
With mingled joy and sadness here,
We sing to thee our last farewell.

Thou art the guardian of our days,
Within thy halls our youth has passed,
And though we tread in devious ways,
We'll serve and love thee to the last.

CLASS ODE, 1906

College Hymn

F. D. Southard

1st

2nd

Dear Maine, for three long, joyous years
We've toiled and played beneath your elms,
Our hearts and souls have learned to love
Your ancient halls and shady realms.

We came here blind to higher thoughts,
Our hearts and minds devoid of sight,
But you, Oh, Maine, with gentle hands
Have brought us to a nobler light.

3rd

So swiftly now, the years roll by
From Winter's snow, to Summer's sky—
We soon will be among the lads
Who've come and gone; good, loyal grads.

Review of the Year

THE balmy summer weather had left the campus of the University of Maine looking its best, and the first days of September had brought with them just enough of Autumn's golden promise to make one feel at peace with the world when the vanguard of our student body arrived in Orono. There were only a few at first, mostly football men and delinquents, but what they lacked in numbers they made up in enthusiasm, and even the delinquents looked upon the morrow's examinations with a feeling that was akin to scorn.

Orono began to come out of its yearly "dope," and after a few of the bolder ones had ventured out to size up the students, the strangeness began to wear off and the old familiar crowd was soon collected in front of the Post Office to hear the college gossip and "jolly" the new students. And those freshmen were new! Just the kind that gazes at the back of a trolley car to see what is pushing it, and swallows all the stories about college life that can be concocted in the gas tanks of the knowing sophomores.

For two or three weeks our time was divided among the various college activities that were once more sent whirling along their several courses, but what took up our time mostly was football and the innocent freshmen. Football took its place in the limelight of our conversation during the day, and we made out tentative scores that were to determine future victories and defeats; we conjured up pictures of victorious celebrations to follow our successful struggles; and we listened scornfully and with a grand feeling of self-confidence to the tales of the strength of Bowdoin, Bates and Colby. Our evenings we sometimes gave over to the amusing spectacle of watching the sophomores point out to the freshmen the path in which they ought to tread; and we came away from these spectacles with pity for the freshmen on account of their disadvantages; and with contempt for the sophomores on account of their overbearance.

Gradually things settled back into their accustomed grooves, and we began to give our undivided attention to Coach McCoy's bunch of football players who now took the trail in earnest. They got their share of victories and defeats from out-of-the-state colleges, playing always with the end in view of preparing themselves for the games with the Maine colleges, the only games that count

for the championship of the State ; and whether they won or lost they played always with that grim determination and that clean spirit of manliness that has characterized all of our teams in the past, and that we are confident will characterize them in the future.

The Colby game showed that our coach knew his business, and that our team was one to be reckoned with ; and when our ever-faithful Bolivar appeared after the game on the balcony of Oak Hall with the score, Maine 16, Colby 0, on his thickly-coated side, the least confident of us knew that Maine would be heard from before the championship was decided.

The newspapers of the State now took up comparisons of the four Maine college teams and wise journalists settled the football situation to their own satisfaction. They sarcastically pointed out the fact that the University of Maine had no stars (a fact which we had admitted much earlier in the season); and they began to estimate the closeness of the struggle between Bates and Bowdoin for the championship. Owing to the fact that we didn't have such good press representatives as we had football players, the newspaper football championship began to look doubtful for us.

Then came the Bates game, played under the most adverse conditions that it has ever been our pleasure (or displeasure) to witness. Alumni Field was one sheet of mud and water, and a driving, disagreeable rain dampened the persons, but not the enthusiasm, of those who attended. Bates had sent over about one hundred of her best representatives with the team in a special train, and we give them the credit of being behind their team throughout the game. The game itself was unsatisfactory in that no score was made on either side ; and this was due partly to the fact that neither team had practiced swimming during the fall, and the ball wasn't a good enough life preserver to float the twenty-two men. But after the game the Bates men were willing to admit that there was another team in the State besides Bates and Bowdoin, even if the newspapers had overlooked it.

The time intervening between this and the Bowdoin game found us in a state of eagerness and expectancy ; eager for the day of the great game to arrive, and expectant as to the result. It came at last, and as a result of the enthusiasm that had been aroused over the game Maine sent to Brunswick the largest special train ever sent out by a Maine college. It was an ideal day for a football game and the field was in perfect condition. The colors of both colleges were in evidence everywhere, and the large crowd present went to show that it was considered the most important Maine game of the season. The teams at last lined up and after the kick-off we found ourselves with the ball on our own

twenty-yard line. In about one minute we were half way from that place to Bowdoin's goal; and in five more, by magnificent playing, we had placed the ball behind Bowdoin's line for the first touchdown of the game. We kicked the goal, and Maine's supporters were so overjoyed that no one seemed to notice the rest of the half which brought forth no more scores for either side.

In the second half we took things our own way, scoring two more touchdowns and kicking both goals. Near the end of the game Bowdoin made a last futile attempt to score, but the whistle found the ball in the center of the field, and Bowdoin beaten on her own ground by a better team, a "no-star" aggregation which proved that the result of a contest still remains to be seen after the last guesses have gone to press.

Football being now over, we gave a little of our attention to the more sordid things of college life. The monotonous routine was broken a little by the Thanksgiving and Christmas recesses, and the basketball games served to keep alive our athletic enthusiasm. The social functions, too, gave us a little enjoyment and something to talk about, and we are sorry to say that the midwinter examinations gave us entirely too much to think about. After the exams. a few of the fellows decided that their health needed recuperation (whatever that means) so they left, some for a year, others for an indefinite period.

The gymnasium and the candidates for the B. A. A. relay team now became the center of interest, and every afternoon little knots of the faithful watched our veteran runners, and many new ones, pound around the running track in preparation for the trials. A sad accident all but happened during these preparations when Major James G. Wallace ordered Steve Farrell and the runners out of the gym, but, out of the kindness of his heart, he finally consented to let them stay. Porter, Currier, St. Onge and Wyman, with Knowlton as sub, were chosen for the team and they left us in a state of blissful confidence. Nor was our confidence disturbed, for on the day after the meet we received the news that they had won an easy race from Tufts; the time, to be sure, was slow, but this was because our men were not pushed, and not because of any lack of speed in them.

We were now in the midst of that most uninteresting of all seasons in the college year—late winter. The days were getting longer, to be sure, and it seemed as if our lessons became longer in proportion. At any rate, we suddenly discovered that they were too long for us to learn, so the most of us spent our time getting the mail at the Orono Post Office, or going to Bangor "on business." Indoor track practice began in earnest, for the indoor meet was only a few weeks off, and with a mile handicap added to the other events of the meet, it

promised even more interest than in former years. And the only shadow cast on the preparations was that left by the ill-fated third assembly, which brought to our minds the apt words of the poet: —

" Of all sad words of tongue or pen,
The saddest are, ' It might have been.' "

The night of the indoor meet found the gymnasium crowded to its utmost capacity, and every class was well represented by enthusiastic students who were bent on cheering their respective heroes to victory. "Pet" Weymouth started it off well by breaking the record in the shot put. Then came one of the few surprises of the evening when our own "Chipper" Clayton beat out the invincible Porter in the trials for the 25-yard dash. Yes, Porter has been "jollied" a little since then, but he is a good natured fellow and doesn't mind it.

The rest of the meet went off smoothly, the freshmen showing up some good material, and some of the old men appearing better than ever before. When the points were counted up it was found that the sophomores had made a little mistake in placing the classes before the meet, they having conceded the seniors first place, the sophomores second, the juniors third, and the freshmen fourth; the only change in this order being that the sophomores dropped to fourth place and by so doing moved the juniors and freshmen up one place. Taken all in all, it was one of the most successful meets ever held in the gymnasium, and augurs well for our track athletics this spring.

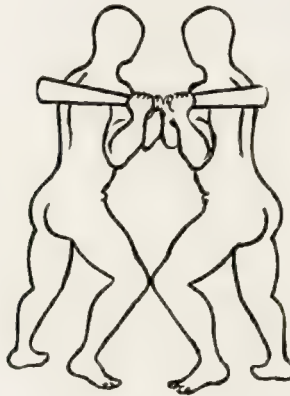

Baseball practice now attracted us to the cage, and after sizing up Butman, our new coach, we decided that we had been fortunate to get him. The candidates showed up well, and the usual pre-season estimates on the baseball prospects began to float around the campus. Our notifications came as regularly as we could expect them, and absolutely nothing happened to disturb the calm serenity that enveloped the whole University.

We now began to feel the alluring tonic of the approaching Easter recess. And it was at this psychological time (it took me three weeks to master that expression) that Rosman Styer Devereux placed his right foot on the stairway of Fame by creating a petition to the faculty to change the Easter recess from Wednesday, April 11 — Wednesday, April 18, to Friday, April 13 — Monday, April 23; the strangest thing about the petition being that it was granted by the faculty, due, no doubt, to Rosman's convincing mode of argument. It may be well to add that Charlie Campbell nearly lost his good name on account of this same petition, by telling Prexy that Fast Day was to be April 19, when in reality it was to come on April 26.

Such small matters, however, had no charms for the editor of THE PRISM,

who had to endure, morning, noon and night, the fiery invectives of the printer, who labors under the delusion that a fellow ought to find more pleasure in writing copy than in anything else in the world, even if it is calling on the co-eds. So the aforesaid editor had to turn a deaf ear to the persuasive call of the sunny campus and turn out copy by the mile, with the fortunate result that the last of **THE PRISM** went to press before the Easter recess.

As for the rest, we feel sure that the present year will end as successfully as it began, leaving on the records an account of the most prosperous year in the annals of the University. And we sincerely trust and believe that each succeeding year will bequeath a cleaner page and a brighter record for the **UNIVERSITY OF MAINE**.

THE BALLAD OF CO-EDUCATION

We have patiently endured the woes of all these college years,
We have tried to drown our troubles, and to smile out through our tears,
We have battled with our enemies, and killed them with elation,
But there's one that we can never down, that curse — co-education.

They have made us go to chapel when we'd rather "cut" and smoke,
They have sold us books and "gold bricks" when we knew it was a soak;
And we never asked a question when they put us on probation,
But what we won't forgive them is that blight — co-education.

They may talk about environment, and how the girls exert
A power for the righteous, and the men that they convert;
But if such a little thing has been the cause of their vexation,
We will swear off all our vices if they'll kill co-education.

Envio:

Give us just a cozy seat beneath some shady apple tree,
And a *common* girl beside us who can "jolly" you and me,
Who has not become a "dead one" in a state of dessication,
And who'll help us to forget that awful stain — co-education.

KNOWLEDGE

My face is veiled from men,
Lest they should see
 The Infinite, and thereby dazed with awe,
Would lose the lesson of Eternity,
 And of the Law.
I gaze far out to sea,
Beyond the fading sunset's golden streams,
 E'er failing to descry
 Just where they lie,
These fair Elysian meadows of men's dreams.

I lead Man to the Treasure-house,
 Then stand aloof,
Bidding him wait the rending of the veil;
Then that shall tell the tale,
 That be the proof
Of those whose truth — or lies
Brought the Hereafter, hidden, to Men's eyes.

My glowing face is veiled, invisible,
 Too bright for mortal eye;
 Hence Man must die,
Trembling in hope of Heaven — or dread of Hell.
Seek thou the newer Life
The larger space;
Perchance thy nobler strife shall know thy face.

THE SONG OF THE TIRED STUDENT

I have struggled through a hundred books of silly, childish lore,
I have filled my brain with problems till I can't hold any more ;
One by one I've studied text books, learned just what each author tells,
And I've gained the honor of it all — just that, and nothing else.

I had heard that Education was a worthy thing to gain,
That a man who didn't have it lived his life through all in vain,
So I started in to win it, and I've worked until I'm sore,
And I've gained a little knowledge — only that, and nothing more.

They have filled me full of Languages and Math. and English Lit.,
They have proved that Education is a deep and yawning pit,
They have taught me the relations of velocity and space,
When they might have spent their time in showing how to draw an ace.

Ship me somewhere out of schooldom where I can't find any books,
Where there are no wise professors, and no college book-store crooks,
Where the chapel bell won't wake me from a sound and peaceful sleep,
And where I'll at least be certain that what brains I have will keep.

THE SONG OF THE ENGINEERS

Our gleaming girders overcast
The foaming flood from strand to strand ;
We chain the deadly desert fast,
And bind it with an iron band.

We rob of Earth her priceless hoard,
We rend her bosom with our drills ;
And lo ! Our eyes look ever toward
The virgin wonders of the hills.

Down there beneath the tropic stars,
Thoughtful of nations yet to be ;
We rend away the land that bars
The mighty commerce of the sea.

Lo ! In the city's throbbing heart,
Or in the country's quiet lanes,
We fashion with our magic art
The steel-shod pathway of the trains.

We chain the "Demon of the storm ;"
We speak across the boundless air :
Our Gog and Magog take the form
Of endless motion everywhere.

Tho' life is lost on every side,
We fear not death, nor any fear ;
But shout across the chasms wide
The War-song of the Engineer.

Grinds

THE MODERN FABLE OF THE FOUR "WASES"

Once, in a Certain Institution where Learning was Handed Out as a Side Dish, there was a Quartet of Blinks who were the Presidents of the Four Classes. They were supplied with the Requisite Amount of Lung Food Warmed Over, together with a Slice of Nerve that was Somewhat Apparent; hence their Positions of Trust in the Classes. If that was the Only Crime they ever Committed

they would Still have been Eligible for a Pair of Wings in the Golden Whence; but their Prominence soon began to Worry them, and they Said to Themselves, "What if we Should Become unduly Famous because of This? Perhaps when we Graduate they will want to make Us Presidents of the United States."

Judging from This We were the Ones who Ought to have been Worried. But we Knew that it Was the Common People that Elected Presidents of the U. S., and that was Us. So we said Nothing, and Endured their Contemptuous Cackles as best we might, Knowing that it wasn't their Fault that they were Presidents.

Time went On, and Commencement forced them to Tear themselves away from the College Stairway of Fame. They went out into the Chilly World, and

Found that People Scorned them for the Same Reason that Their Classmates had honored them; they didn't Know Them. They got Jobs as Engineers (on a Train) and When they Saw some of their Formerly Unknown Classmates in Positions that Controlled their Bread Getting, they were a Little Lame. And without Giving a Thought to the Old Sour Raisin Idea, they Said to Themselves, " Anyway, It is Better to be Right than President."

MORAL: — It is Better to Be a Will-Be than a Was.

TO A DEAD ONE

Here lieth the body of
PIN STURTEVANT
the only dead one
on the
PRISM BOARD

In consequence of his inability to work
he was challenged to mortal combat by the
EDITOR - IN - CHIEF

He succeeded in dodging his responsibility
but was finally mobbed and captured
at dawn
by the Prism Board in battle array
led by the Editor
and hanged by the neck to a near-by tree
until he was deader than ever

"There is not less wit nor invention in applying rightly a thought one finds in a book than in being first author of that thought." — THE EDITORS.

"I've done the State some service and they know it." — PREXIE.

"With an aspect of iron, that when I come to woo ladies I frighten them."
— A. R. LORD.

"His voice was propertied
As all the tuned spheres. — "BABE" WOODS.

"Wait till you hear me from the pulpit, there you cannot answer me."
— GARLAND.

"Don't stir, gentlemen; 'tis but an author." — "DOC" COLCORD.

"Only silence suiteth best." — "SQUAB" MARTIN.

"Set up an hour-glass; he'll go on until the last sand make his period."
— TREMAINE.

"A college joke, to cure the dumps." — PROF. STEVENS.

"Thus grief still treads upon the heels of pleasure,
Marry'd in haste, we may repent at leisure." — TOWER AND LEEDS.

"How much a dunce, that has been sent to roam,
Excels a dunce that has been kept at home." — MACOMBER.

"For discord makes the sweetest airs." — COLLEGE CHOIR.

"A company of tyrants is inaccessible to all seductions." — THE FACULTY.

"Too fair to worship: too divine to love." — BELLE HARRIS.

"A lump of death—a chaos of hard clay." — JACK BURLEIGH.

"The booby father craves a booby son." — "HONEY," 1ST, HONEY, 2ND.

"Spires whose 'silent finger points to heaven.'" — THE ART GUILD.

"Conceit may puff a man up, but never props him up." — FRANK BANKS.

"I have a good eye, uncle. I can see a church by daylight."
— "GUS" CRAM.

"Yet even her tyranny had such a grace,
The women pardoned all, except her face." — EDITH TATE.

"Then farewell, Horace, whom I hated so." — HORACE HAMLIN.

"By outward show let's not be cheated,
An ass should like an ass be treated." — "VON" WITHERELL.

- "Comb down his hair; look! look! it stands upright."—"DOC" COLCORD.
 "I do confess I blaze to-day; I am too bright."—HOOPER.
 "Swelled head over *nothing*."—"FAT-HEAD" FENN.
 "All the attributes of a maiden."—"LIZZIE" NEAL.
 "No sooner met but they looked;
 No sooner looked but they loved."—H. C. STETSON AND MISS PERRIN.
 "The best stuff is done up in small packages."—"MOUSER" REED.
 "I do desire that we may be better strangers.'"—"MD. 5 AND 6.
 "Wilson's: That's all."—SYLVIA W—D.
 "Asleep at the switch."—FRESHMAN AUSTIN (returning from Bangor on the last car).
 "In the Prison cell I sit."—PERCY SEAMON.
 "I am truly a leader in my class."
 —"CORNERED BEEF AND CABBAGE" HIGGINS.

When Hiram was a freshman green,
 He, to his girl did write a letter;
 But left it where it could be seen,
 How strange it is, he knew no better.

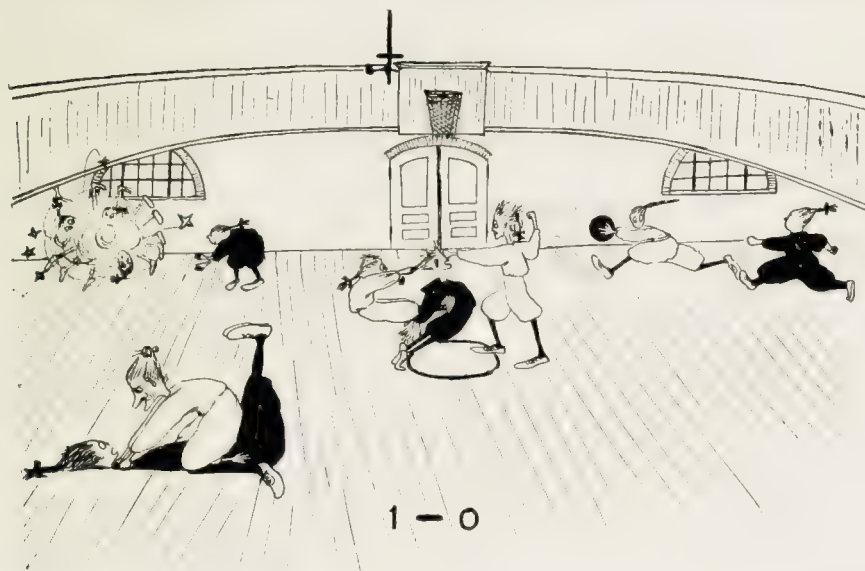

PHI GAMMA HOUSE,)
 ORONO, MAINE.)

DEAR FLORENCE:—

We won from Colby yesterday; the score was 16—0. We got 16 and the Colby fellows got 0. I was awful cold all through the game. Think I will put on my heavy underwear before the next game. Have you put on yours yet? Wish you would come up. I have three room mates; they are the best fellows I ever saw. I know you would like them. Last night, after I went to bed, they came up and called me, so I could have some cider. I drank about two quarts and then we had a celebration; the best time I ever had. I am getting along fine in my lessons. My teacher's name is Mr. Rogers. He thinks I am a fine fellow and says I'll make a smart man some day. I know some girls up here, but I don't like them so well as I do you. Won't you be glad when I come home?

Be good and you'll be happy. From

HIRAM.

Does this need any explanation?

No! This shows the tactics that the co-eds worked on the Oldtown maidens with such overwhelming success.

Who is this tall damsel, who is executing a "short jab to face" on her opponent?

Why, that is "Sylvia" at one of the tragic moments of the game.

It is easy to recognize the "Widder," but what is she trying to do with the Oldtown girl?

Oh, she's just filling up a little hole in the floor, where she stubbed her toe during the first of the game.

COULD HE HAVE MEANT THE PROFESSOR OF MECHANICS.

PREX. FERNALD (illustrating some point): A case is cited of a man who had always been blind, and knew objects only through the sense of touch. By good treatment, however, his sight was restored to him. Someone held a pair of "Scissors" up in front of him and asked him if they meant anything to him. He said at once, "Why, yes; that is a man on horseback." When he felt of them, however, he said, "That's only 'Scissors.'"

THE MYSTERY OF THE LOST CREAM

CHARACTERS.

First Year Aggie "Sloc" B.

Second Year Aggie..... "Shorty" E.

Short Aggie "Sid" B.

Aggie Prof. — Farm Hands.

Time of year — Winter.

Scene I — In farm creamery at U. of M. Time — 4.30 A. M.

Prof. (roll call taken): "Boys, we will butter make."

Boys (in unison): "All right."

Prof.: "Don your frocks, wash hands and face and bring milk to separator."

"Sid": "O, hum!"

Milk is brought and weighed. Prof. and farm hands exit.

Scene II — Creamery. Time — Half hour later.

"Shorty" (turning separator, sweating): "This is tough."

"Sloc": "What! Coming hard?"

"Shorty": "Yes, but nearly done, Grace a Dieu."

"Sid" (approaching with bumpers): "Let's drink."

Aggies-all: "Well said."

They drink, and drink, and drink to the good cows, faculty and Prexy.

Short Aggie (looking out of window): "Yonder comes teacher."

Bumpers are hid. Cream is made ready for churn.

Prof. (entering): "Not churning yet!" (Sees cream in front of churn.)
 "Boys, I now weigh cream and milk to show theory of no loss." (Puts cans on scales.)

Aggies (in unison): "Oh!" (They exit — tumbling. Short Aggie faints.)

Prof. (surprised): "Hold! 'Cutting?'" (Is left alone. Weighs skim milk and cream, and finds shrinkage of 12 pounds. Prof. falls unconscious.)

END.

While the musical clubs were in Portland, Joe Goodrich was walking down toward the station, and was wearing his "I Be It" smile, thinking that he looked pretty "sporty."

A youthful "mucker": "Hey, youse fellers! Get on to the guy with the brass buckles on his shoes. He comes from Skowhegan, all right, all right."

"The Mummy and the Humming-bird."

COMING ATTRACTIONS.

- "On Satan's Mount" "Scissors"
 "The College Widow" "Widder" Jones
 "The Matchmakers" The Fraternity Matrons
 "The Prince of Pills" H. G. Philbrook
 "Just Out of College" The Instructors
 "The American Lord"
 "Count" Guerric Gaspard De Coligny
 "Miss Simplicity" Miss Holden, '09
 "Car Men" Lang, ex-'05, Floyd, '07
 "King Dough-Dough" "King" Cole
 "Love's Lottery" Edith Aiken
 "The Telephone Girl" D. C. Perry, '07
 "The Pearl and the Pumpkin"
 Belle Harris and "Bill" Cobb, '08
 "The Squaw-Man" Parkin, '09
 "Before and After" "Squid" Hill
 "The Grafters" Coffin, '07, and Sampson

"Pat" Butterworth came into the 10.00 A. M. division of mechanics one morning at 10.55 A. M.

Prof. Weston: "Your coming in reminded me that I've neglected to call the roll."

So "Pat" gets credit for a full hour.

Prof. Lentz (to "Jimmy" Farnsworth who has just fallen out of his seat): "I actually thought that child would hurt himself sometime."

In the center we see President Roosevelt as he appeared while hunting bears in the "Rockies." On his right is Carrie Nation who has just finished cleaning out a saloon with the assistance of the gentleman on the left, who was wise enough to see that his photograph would never be framed unless he framed it himself.

"Newry" always had a large supply of "sporting blood," and when somebody bet him \$0.50 that he wouldn't run from Oak Hall down to the lower waiting room in his shirt tails at high noon, he immediately took him up and what's more he gave him "a run for his money."

"Janie" and his little son were taking dinner at the Phi Gamma Delta house.

"Janie": "Have some chicken, son," (glancing at "Shorty" Southard), "it makes little boys grow tall."

Prof. Weston (slightly bewildered): "Here we have three spaces acting in force."

BUCKNAM: "The hypothesis of a right triangle."

This is the "Major Commanding the Battalion" as he appears when not in uniform. Is it strange that the freshmen are not fond of drilling?

"Hod" Hamlin's favorite speech: "Now cut out this fooling, and think of the Golden Rule, 'use me as you would like me to use you,' or you won't get through this stuff—I'm running this!"

Carl Reynolds, '08: "Prof. Jewett, have you an incubator in the lab.?"

Prof. Lentz (to Mr. Drew): "I honestly think that when you die they will have to kill your *mouth* extra."

Prof. Lentz (to "Pin" Sturtevant): "If I should mark all of your mistakes on this prelim. your rank would be 20 below zero."

Wyman, '07: "This man was, at one time, Major of the U. S."

"Babe" Woods wishes his latest portrait to be brought to the attention of the student body, and has hired a small place on this page for that purpose. This was taken during chapel services while he was stumbling over some of the longest words in one of the longest psalms in the Bible.

Ham (who had forgotten his book and was therefore unable to call the roll in physics): "If anyone is absent, will he please raise his hand?"

Prof. Huddilston (speaking in chapel): "I was walking up in front of two fellows. They were walking behind me."

Prex. Fernald: "I am so preoccupied that I hardly ever notice anyone who comes in late, but I will say that I notice anyone who tries to slip out before the hour is over."

Prof. Weston: "Mr. Harlow, define work, please." And everyone laughed.

"STUB" GETS A HARD SLAM.

It so happened that one night there were three different fraternity dances held here at the college and consequently the last car down was pretty well loaded. After all the ladies were seated there were still one or two seats left unoccupied and "Stub" Wildes happened to be lucky enough to get one of these. Everything went well until the car reached Veazie, where the inmates of the car were reinforced by some of Veazie's "four hundred" who, it seems, had also been having a social dance. Several of the women among the newcomers were chewing gum quite audibly which fact caused no little merriment among the original occupants of the car. Finally one of the aforesaid gum-chewers, who had worked herself into quite a frenzy because "Stub" didn't get up and give her his seat, addressed the following remark (to him in particular and the whole car in general):

"May be it ain't very polite for us to chew gum in public, but to my mind it's better to do that than for gentlemen (if you call them gentlemen) to sit still while we *ladies* stand."

To Chas. J. Symmonds, Capt. 12th U. S. Cavalry:

Enclosed please find the excuses which I offer for my absences from military drill on the specified dates.

Dec. 21. I started home as I was obliged to go to work the next morning.

Jan. 10, 1906. My guardian passed through Bangor and wanted me to meet him.

Jan. 23. I had a bad cold; took quinine the night before and my head felt pretty bad. I didn't feel like marching much.

Jan. 26. I had an appointment with the dentist and did not finish in time to get back.

Feb. 15. The water pipe burst in "frat." house and as I was a freshman was sent for a plumber.

Feb. 19. I hurt my ankle and could not drill without it paining much.

Feb. 21. I walked around quite a lot the day before and went to drill which made me much worse in my ankle, so I could not drill on this day.

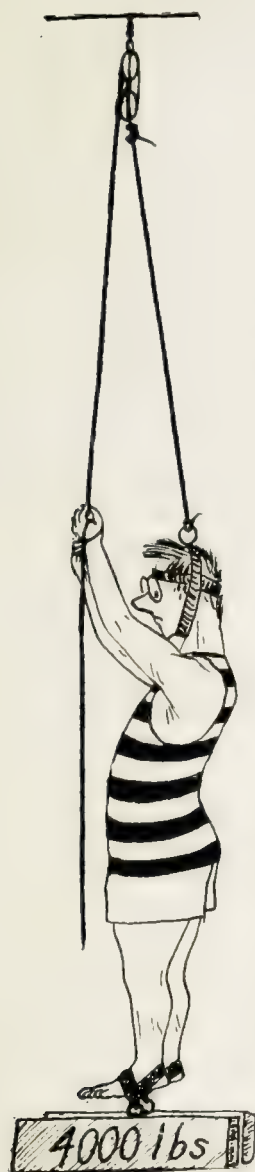

Feb. 26. I was sick. Just barely dragged myself through the other recitations.

Mar. 13. I was obliged to go to the bank on business before it closed.

Mar. 22. Sick again.

Respectfully submitted,

HARRY A. WHITE.

HOW TO GROW TALL.

Wouldn't you like to add from two to five inches to your height?

To be a good man to dance with?

To be tall enough to see in the crowd?

To improve the symmetry of your figure and to add to your general appearance?

All you've got to do is write to us and we will send full directions FREE.

And "Squid" Hill saw this ad. and wrote with the almost miraculous results here shown.

When a man gets to be a senior we give him credit of knowing something, at least. But that does not alter the facts of the case. It is reported on good authority that Freddie Harlow was seen over in the shop sharpening his razor on the grindstone.

It was hard on "Sloc" Burns when freshman Farnham learned that "Sloc" was to call upon the Larkin Soap Girl, No. 78, and called ahead of time; and still harder when the girl sent her little brother to the door to tell "Sloc" that she was not at home.

When Joe was up in Aroostook arranging a trip for the musical clubs, his business called him over into New Brunswick. This photograph shows him as he looked when re-crossing the line."

Prof. Segall says that his 7.45 division in French was disbanded because he could not afford to throw away one-half of a cigar each morning.

"Adjutant-General" Hooper is to be retired on full pay in the year 2000.

March 20. (The night that the lights went out) "Janie" and "Babe" Woods made a call over at the coop.

"When the cat's away
The mice will play."

And "Cream" Marsh, although he knew he was doing wrong and acting in an unfreshmanlike manner, thought it would be cunning to wear his derby hat on the streets of Bangor. His idea on the subject changed, however, when he discovered that Bill Sawyer (the hundred-yard man) was on his trail and rapidly overhauling him.

"Smut" Washburn determines when prelims. shall be given and when sentences shall be passed in for Prof. Lentz's German classes.

Why has Rex Gellerson taken up smoking? And why does he enjoy having his friends smoke cigars on him? Oh! he is clerking, off and on now, at Mutty's, Oldtown.

THEY CAN TELL US, IF THEY WILL.

How to warm over old jokes.—"Jimmie" Stevens.

What the walking is like between Costigan and Oldtown.—"Mucker" Hoxie.

How to make an idiot of one's self.—"P. H."

How to wear divided skirts with a dress suit.—"Turkey Bee."

How to become valedictorian.—"Whang."

How to run a military hop as a private party.—"J. G. W."

What \$8.00 worth of 1906 PRISMS amounts to.—"The Seniors."

How to throw out your chest.—Morley.

How to get notifications cancelled.—Tom Malloy.

What they think of "Win" Bearce in his role of would-be co-ed-chaser.
—The Co-eds.

How to bum tobacco.—Ben Brann.

Nothing.—"Tubby" Floyd.

How to ask senseless questions.—P. Bean.

Anything, but how to teach hydraulics.—H. H.

How to raise sheep.—"Boardy."

How to lead an orchestra.—Plummer.

How well the college store pays.—Shylock Bros.

How to study.—Jim Elms.

How they've been talking daown een Madeeson for an eendef'neet period.
—Scissors.

How it seems to be a general in the army.—Hooper.

A PETITION.

Know all Men by these Presents:

We, the undersigned, do hereby petition those misguided persons who reign supreme over the Mount Vernon House, that the ten-o'clock rule which is enforced so stringently in the aforesaid biddy-coop be hereafter abolished.

"Bill" Hall,	Edith Aiken,
H. C. Stetson,	Ola H. Perrin,
"Cracker" Wilson,	"Sylvie" Wakefield,
"Win" Bearce,	Mildred Mansfield.
V. B. Jordan,	Eva Libby,
"Betsy" Reynolds,	Sarah Brown.
"Bill" Schoppe,	
"Whangdoodle."	

Who is this dejected looking person?

Why, that is "Mucker" Hoxie.

Why is he standing there in such a strange attitude?

He is hardly awake yet, and hasn't got his bearings.

Why is he shaking his fist at the train?

Because he has just found out that the boys were "jollying" him when they told him that he had got to Oldtown and he realizes that he's got to "hit the grit" if he wants to sleep at Cousin George's to-night.

ENGINEERING DICTIONARY.

A combination of cranks.....The faculty
 Compression.....The effect of a couple thoroughly (em)braced
 Satisfactory face contact.....A kiss
 Stayed to resist constant pressure.....A girl's waist
 Electric lamp.....A bottle containing a burning hair-pin
 Release.....Effect produced by marriage

Nov. 2. Boardy's office became a sheep pasture.

HEARD IN CONSTITUTIONAL LAW.

FRESHMAN GOULD: "Professor, can the State prohibit the sale of liquor in the original package?"

ALLIE: "Now—I think that perhaps Mr. Campbell can answer your question."

ALLIE: "When the vice president of the U. S. who acts as president of the Senate goes on a fishing trip, the president, pro tem, takes charge."

BILL SAWYER (thinking that it would soon be his turn to recite, and hoping to use up a little time): "Who takes charge if the president, pro tem, goes away on a fishing trip?"

ALLIE: "The U. S. law provides that a man cannot have more than one wife. A person living in Utah cannot legally have three wives, but he can have one and—two others."

ELLIOTT: "If anyone down in New Brunswick should copy your book on Constitutional Law, could you say anything?"

ALLIE: "I could, and probably would SAY SOMETHING,—but I could say nothing to them according to law."

Who work from morn till late at night,
With brooms and brushes dirt they fight,
Lest in their room dust be in sight?
The Ediths.

Who coaches the co-eds in basket ball
So they beat Oldtown High and all,
And wishes she'd grow a little bit tall?
It's Sylvia.

Who talks to us of men of yore
In the broad field of literature,
But mathematics can't endure?
Surely Minnie.

Who's studied Greek all these four years,
In Greek she talks and Greek she hears,
And most of all "Paddy" reveres?
'Tis Carolyn.

Who need a ducking now and then,
As happens to the best of men,
When they were fresh and shouldn't have been?
'09 Co-eds.

This is "Obadiah Tubbs" of "Dick Merriwell" fame,
 And right here, we will tell you how he
 won his name;
 The protuberant belly at once puts you
 wise,
 That he's "second to none" in devouring
 pies;
 But as there may be some who don't know
 him at sight,
 Let us add, "O. B. Tubbs" is the "short"
 for "Deak" White.

Not long ago some invitations to the military hop were sent out with "J. G. W." written across the face. There was a good deal of speculation at the time as to what these initials stood for. In case there may be some who are still in doubt we will explain them. "J. G. W." stands for "Just Get Wise that I am the celebrated James God. Wallace, and you are coming to *my* military hop because *I* allow you to and not because you have paid me your good *dollar*."

AS IT IS DONE ON THE FACULTY — At a Reception.

Hostess: "Miss Weeds, I want to introduce you to a fellow worker of yours whom I am quite sure you will enjoy. Prof. Lower, Miss Weeds."

Thirteen minutes later. Prof. L. (confidentially): "Do you know there is something about you I like awfully well."

Miss Weeds: "Really? That's so queer, for I was thinking that same thing about you."

Ten minutes later. Prof. L.: "Have you any personal objections to marriage, Miss Weeds?"

Miss Weeds (very promptly): "Not in the least."

And a quarter of an hour afterwards the minister asked if he might kiss the bride.

RED LETTER DAYS OF THE YEAR

Sept. 18. Arrearage examinations begin and large numbers of the old students were seen on the campus.

Sept. 19. Entrance examinations begin and the whole landscape underwent a decided change. The leaves and grass turned two shades greener in the attempt to outclass the freshmen.

Sept. 20. Prof. Segall's brother, Prof. Lentz, arrived.

Sept. 21. Every student went into mourning on hearing that "Doc" Lewis had a leave of absence for two years.

Sept. 22. The freshmen donned their night apparel and entertained the inhabitants of Orono.

Oct. 2. Perry Bean gives Prof. Weston a few instructions to follow in Junior Field Work.

Oct. 9. "Squab" Martin, for some unaccountable reason, kept his mouth shut for 15 minutes.

Oct. 20. "Mother" Dan Chase felt that he had been offended in some way and carried his lower jaw two inches lower than usual.

Oct. 20. A new weathervane put up on the chimney of Oak Hall. (Someone missed a carriage.)

Oct. 29. Hod Hamlin informed the juniors in "railroad" that they couldn't expect to ride thro' on his railroad unless they studied now and then.

Nov. 10. Sparrow spoke to someone.

Dec. 9. Fathead Rounds' head contracted $\frac{1}{1000}$ m.m.

Dec. 12. Shorty Southard was seen down cellar sawing wood.

Dec. 13-17. Miss P—l—y was on the campus and Bill Schoppe couldn't find time to go to recitations.

Jan. 3. A large number of students wore white collars to chapel in order to show off the neckties that were given them for Xmas.

Jan. 7-8-9. Good skating on the river and small attendance at time work.

Jan. 12. Rain and no skating. Hence better recitations.

Jan. 17. "But" Harlow took a nap in Cv. 4 and "Allie" invited him to go home and make up a little sleep.

Jan. 22. The 7.45 division frozen out in mechanics.

Jan. 22. Profs. Jackman and Segall enticed into chapel for first time this year by Miss Mead, whose oratory so enthralled Prof. Hurd that he made quite a (Mead) lay out of reading the Psalms.

Jan. 23. Major General Wall-eyed Wallace ordered Steve and the relay team out of the gym.

Jan. 25. Co-ed basketball practice and Johnnie Harvell bought out all of Shylock's candy in order to feed the co-eds, and in that way "stand strong" with them.

Jan. 27. Co-eds vs. Oldtown. Johnnie worked them all right as he had the job of referee. Largest attendance ever recorded in history of basketball at U. of M.

Feb. 16. Worcester wore his tattered uniform for the last time.

Feb. 17. After an affectionate parting with P. H., Worcester left for a summer clime.

March 26. Instructor Prince found a nickle.

March 27. After much anxious worry he decided to ride down to Orono for once and spend his nickle.

April. 1. Not a thing happened and THE PRISM got fooled completely, as it expected to get a lot of jokes on that day.

COACH MCCOY.

To whose work we owe a large part of our success in football last fall.

Who is this man?

This is Bill Sawyer.

Why does he run? Is someone chasing him?

Yes, the whole '09 team is after him.

Has he a pumpkin under his arm?

No! He has a football.

Where did he get it?

He slugged a freshman in the solar-plexus and caused him to let go of the ball. Whereupon Bill took it and made a touchdown for '08.

The following postal arrived in reply to Mr. Pennell's application:

FOR MR. A. JAY PENNELL, Student,
Orono, Maine.

We are still in the business of furnishing outlines and material for Essays, Debates, Orations, Theses, Lectures, etc. We also write the complete article if the customer so desires.

COLCHESTER, ROBERTS & Co.,
Tiffin, Ohio.

Prof. Lentz (dismissing class in German and pointing to open door):
"Here is such fine opening for you young men."

March 28. "Scissors" gives the 10.00 A. M. division a cut in mechanics.

TO THE FUNNY MAN OF THE U. OF M.

A murmur rises, breezy tones,
Then noise of everything doth cease,
When out upon the platform
Comes Joe, to speak his piece.

Like a roaring cataract
Does the speaking flow,
And when he bows and leaves the stage,
They want one more from Joe.

He waves his arms and stamps about,
His voice he raises high,
He sinks upon the platform floor,
And looks up to the sky.

Ah! deathlike is the crowded house,
His speaking simply awes,
He growls deep in his rasping throat,
And waves his jointed paws.

His hair he tosses all about,
He tears it out by bits,
And screws his face all out of shape
In "Ec - a - lec - tic Fits."

When he leaves the bright-lit stage,
He sweats from every pore,
But still the audience keeps clapping,
Calling for more and more.

But Joe, he smiles a little grin,
And on he will not go,
For he knows when to put on brakes,
Does funny "Little Joe."

[EDITOR'S NOTE.—The above poem was composed by "Shorty" Southard, during a recitation in Anthropology. Neither "Shorty" nor Joe were in favor of publishing it and therefore were not consulted in the matter.]

Who is this brave huntsman?

This is Frank Alton.

But what is this object that we see tied hand and foot?

That is a deer.

What is Frank about to do?

Well, if he can get near enough he will shoot this deer.

If he shoots the deer will he tell his friends?

Oh, yes; he will tell not only his friends but his foes. In fact, he will relate the whole story to anyone who will listen to him.

SCENE — No. 101 Oak Hall. "Sammy" seated, smoking his pipe.
Enter Pickering.

Pick: "What yer doing, Sammy? Smoking?"

Sam: "Yes, I'm smoking, and it's a fine day, and I got up this morning. I've eaten breakfast, and dinner, and I expect to eat my supper. I'm not plugging, and the roof isn't leaking, and the mail hasn't come up, and it is a fine day."

Pick: "What's the matter with him? Crazy?"

Feb. 5. Cribbing was abolished.

THIS IS RACHAEL.

THIS SPACE IS PAID FOR BY TODD.

WISE SAYINGS OF PICKERING.

On hearing dinner bell: "What's the matter? Dinner ready?"

On seeing a man enter covered with snow: "What is it? Snowing out?"

On entering the Count's room: "Hello, Count! Plugging?"

(Trouble always begins at this point.)

JUDGING PEOPLE BY THE COMPANY THEY KEEP.

Prexie Fernald (in Pedagogy): "Now, I think the pitching of a ball illustrates this point very well. Some members of the class know more about that than I. Miss Hodgdon, will you tell us what the pitcher's object is?"

"Scissors": "Mr. Campbell has done this problem correctly. All it needs is a little ordinary horse-sense."

Campbell didn't know whether to take it as a compliment or not.

DIPLOMACY IN THE GARDEN OF EDEN.

Totman (in Cv. 4): "It was quite a number of years ago (away back in Adam's time I think) that the U. S. first sent an ambassador to England."

"Johnny" Aubert (to class in Chemistry): "Can you tell me why, when you pull the trigger of a gun and it doesn't go off, and you pull it again and it goes bang! what makes it act so?"

Class: "No."

"Johnny": "Neither can I."

"I guess we'll have to get up a minstrel show to *defraud* the expenses."
— Caleb Johnson.

Gorham, W. H.....	xi	Weeks, Benj.	xl
Graves, E. D.....	xxxvii	White, T.....	vi

To you, if you have not dealt with us in the past, we offer the same cordial reception that we extend to our many U. of M. patrons who have already found it to their advantage to buy

Furniture, Carpets and Draperies

of us. Our stock is complete in every department.

We not only have the largest stock of goods shown anywhere, but we also have some very exclusive designs and patterns.

It is with a feeling of confidence that we invite you to come in and select the furnishings for your new room or something new to brighten up the old.

For it's always fair weather when Maine Fellows get together and come down to Chandler's and buy their furniture, as we have the right goods and the right prices.

We give all U. of M. students a special discount from our regular prices.

CHANDLER & CO.

84, 86, 88 HAMMOND ST.,

BANGOR, ME.

I have found out a gift for my fair. Read the ads. and you will find yours.

Though Dress Doesn't Make the Man Yet It Helps An Awful Lot

It is therefore "up" to the ambitious college fellow to be well dressed ; and it is "up" to us to see that he has the right sort of wearables.

We are proud to say that our line of Furnishings represents the very latest and most progressive in fashions for men ; and that our stock reflects the exact correct metropolitan effects always.

Don't Forget Our Custom Tailoring Department.

You may not be in need of a new suit this very minute, but you're going to need one sooner or later and we want you to know that we are prepared to serve you to perfection in this line, and at rock bottom prices. We always delight in showing our goods to callers. Call ; look—any time.

THE MUDGETT BROS.

1 9 M A I N S T R E E T , B A N G O R

Complete outfitters to men, from head to foot,
from hat to hose.

"A cut in the morning is worth two in the afternoon."

To Fit

or not to fit; that's the clothing question. It's GOT to fit, and fit right, if I make your suit or overcoat. I won't be satisfied otherwise; neither will you. Hundreds of U. of M. fellows will tell you of the good tailoring I have done for them; now why not let me tailor for YOU? Up-to-date service assured.

FOR COLLEGE BOYS

A good Overcoat and a good Suit are known by the shape they keep and a good clothier by the clothes he sells. Benoit's good clothes are built to satisfy the most exacting dresser. "Differently better" garments. They "stay right" outside because they're "stayed right" and "built right" inside. The patterns—the cut—general tailoring and fit stamp 'em "custom tailorish." Everything about 'em (except price) has "custom touch."

The University of Maine

ORONO, MAINE.

The University is divided into Colleges, each offering several courses upon related subjects.

College of Arts and Sciences.

Elective Courses are offered leading to a Bachelor's degree.

Students may elect as their major subjects, Mathematics, English, Greek, Latin, Modern Languages, Physics, History, Civics, Biology.

Three years of work in any one subject constitutes a major. Minimum requirements in English, Science, Languages, Mathematics. All other work elective.

SUMMER TERM. — The Summer Term is a department of the College of Arts and Sciences.

The College of Agriculture.

The AGRICULTURAL Course, leading to the degree of B. S., is designed for those interested in practical and scientific agriculture, or those wishing to become teachers or investigators of agricultural science, or writers upon agricultural subjects.

SPECIAL Courses are offered in Agriculture, Horticulture, and Dairying, for those who can spend but a short time in the University.

CORRESPONDENCE AND READING CIRCLE Courses for people at their homes.

The AGRICULTURAL EXPERIMENT STATION is devoted to the scientific investigation of topics particularly related to the agricultural interests of Maine.

College of Technology.

Each of the Engineering Courses leads to the degree B. S.

The CIVIL ENGINEERING Course is designed for those who wish to become surveyors, railroad, highway, hydraulic, bridge, or sanitary engineers.

March 24. A "dark-horse" shows up and defeats Porter at the indoor meet.

The MECHANICAL ENGINEERING Course is designed for those who wish to become managers of manufacturing plants, or general mechanical engineers.

The CHEMICAL Course is designed for those who wish to become professional analysts, teachers of chemistry, or managers of industries in which an extensive knowledge of chemistry is needed. The degree given is B. S.

The ELECTRICAL ENGINEERING Course is designed for those who wish to fit themselves for any line of practical work in electricity.

The MINING ENGINEERING Course is designed to prepare for practical work in the investigation and development of the mineral resources of the country.

The FORESTRY Course is designed for those who wish to gain a practical knowledge of forestry. The degree B. S. is given.

College of Pharmacy.

The PHARMACY Course is designed for those who wish a broad training, both general and technical, for the practice of pharmacy.

The SHORT COURSE in Pharmacy is designed for those who wish the pharmacy course usually given in the colleges of pharmacy.

College of Law

The COLLEGE OF LAW is located at Bangor, and maintains a course of three years, leading to the degree LL. B.

The GYMNASIUM offers the best opportunity for physical development. Athletic sports under proper conditions are encouraged. Military drill is required of all able bodied male students during a part of the course.

The students maintain a Glee Club, a Mandolin Club, a Banjo-Guitar Club, an Orchestra, a Military Band, a weekly and a monthly publication.

A student's necessary college expenses, including board, need not exceed \$225 a year. For catalogue and circulars, address the President.

GEORGE EMORY FELLOWS, Orono, Maine.

Waterman's Fountain Pen

The pen with  the Clip-Cap

Commencement

If you would be successful—save time. Waterman's Ideal Fountain Pen is one of the greatest time savers of the period. It is a necessity to everyone in a business or professional career. If you realize this, why not make a gift of Waterman's Ideal Fountain Pen to some graduating friend? Nothing is more acceptable, nothing more appropriate. It is ultimately cheaper than steel pens and ink bottles, and with proper care it will last a life time. Pens of our manufacture have been in use since first made, twenty-two years ago, and they are as good to-day as ever. They are more essential to success to-day than ever.  Pens purchased anywhere are exchangeable everywhere if in any degree unsatisfactory. Your pen should suit your hand, and there is a pen made for everyone.

Stationers, druggists and jewelers almost everywhere carry varied assortments. Our own branch offices give particular attention to repairs. Write for a copy of our booklet "Points for Penmen."
